Thank you for choosing Consumer Cellular!

We know you’re excited to use your new Consumer Cellular Link, and this user guide will help you get familiar with it, so you can start using it as soon as possible. Each section includes instructions and pictures to make it easy to start using your device. If you would like to learn more, turn to the back of this guide, where you’ll find the SUPPORT section.

We’re always happy to help you!

GETTING STARTED

INSTALLING A microSDHC™ CARD
Power off your phone before installing or removing the microSDHC card.
1. Place your finger in the slot at the lower left of the back cover to lift and remove the cover.
2. If the battery is installed already, remove it.
3. Hold your microSDHC card with the metal contacts facing down and slide it into the microSDHC card slot.
4. Install the battery.
5. Press the cover gently back into place until you hear a click.

REMOVING THE microSDHC CARD AND THE nano-SIM CARD
1. With the phone powered off, open the back cover and remove the battery.
2. Press the soft block that keeps the cards in place and slide the nano-SIM card or the microSDHC card out.
CHARGING THE BATTERY

Your phone’s battery should have enough power for the phone to turn on, find a signal, and make a few calls. You should fully charge the battery as soon as possible.

If the battery is low, there will be a pop-up message on the screen. As you charge your phone, the external screen will show the exact battery level.

**WARNING!** Use only approved chargers and USB cables. The use of unapproved accessories could damage your phone or cause the battery to explode.

1. Connect the adapter to the charging jack. Ensure that the adapter is oriented correctly. Do not use force.
2. Connect the charger to a standard AC power outlet. If the phone is on, you’ll see a charging icon, such as ☀️ or ⚡️, appear in the status bar.
3. Disconnect the charger when the battery is fully charged.

**NOTE:** If the battery is extremely low, you may be unable to power on the phone even when it is being charged. In this case, try again after charging the phone for at least 20 minutes. Contact customer service if you still cannot power on the phone after prolonged charging.

EXTENDING THE BATTERY LIFE

Active applications, screen brightness levels, Bluetooth usage, and GPS functionality can drain your battery. You can follow the helpful tips below to conserve your battery power:

- Reduce the screen backlight time.
- Lower the screen brightness.
- Turn Bluetooth off when not in use.
- Disable the GPS function when not in use. Most applications using this function will periodically query the GPS satellites for your current location; each query drains your battery.

POWERING YOUR PHONE ON/OFF

- Press and hold the Power/End Key to turn on your phone.
- To turn it off, press and hold the Power/End Key to open the options menu, and then select Power off.

</tbody>
</table>
GETTING STARTED

GETTING TO KNOW THE HOME SCREEN

The home screen is the starting point for your phone’s applications, functions, and menus. You can customize your home screen by adding shortcuts, folders, widgets, and more.

PERSONALIZING

CHANGING THE SYSTEM LANGUAGE

1. From the home screen, select 📚 > Settings > Device > Languages & input > Languages.
2. Select the language you need and press the OK Key.

SETTING THE DATE AND TIME

1. From the home screen, select 📚 > Settings > Device > Date & time.
2. Set the date, time, time zone, and time format.
   • To adjust the date and time automatically, press the OK Key to turn on Automatic date & time.
   • To adjust the date and time manually, press the OK Key to turn off Automatic date & time and select Set date / Set time to change the date and time.
   • To adjust the time zone automatically, press the OK Key to turn on Automatic time zone.
   • To adjust the time zone manually, press the OK Key to turn off Automatic time zone and select Select time zone to set the correct time zone.
   • To adjust the time format, press the OK Key to turn on or off Use 24-hour format.
CHANGING THE RINGTONE AND NOTIFICATION SOUND
You can customize the default ringtone for incoming calls and the default notification sound.
1. From the home screen, select ☰ > Settings > Sound profiles > Sound.
2. Select Edit.
3. Highlight Phone ringtone or Default notification sound, and press the OK Key.
4. Select the ringtone you’d like to use, and press the OK Key.
   NOTE: If you have additional audio files saved in the internal storage or the microSDHC card, select Add ringtone or Add notification at the bottom of the list and select one as the ringtone.
   NOTE: See Contacts – Setting a Ringtone for a Contact for how to assign a special ringtone to an individual contact.

ADJUSTING VOLUMES
1. From the home screen, select ☰ > Settings > Sound profiles > Sound.
2. Select Edit.
3. Highlight the Media volume, Alarm volume, Ring volume, or Notification volume slider.
4. Press left or right on the 4-way Navigation Key to adjust the volume.
   NOTE: You can adjust the media volume when a media application is in use by pressing the Volume Key. If no media application is active, press the Volume Key to adjust the ring volume (or the earpiece volume during a call).

SWITCHING TO VIBRATION OR SILENT MODE
You can set the phone to vibration or silent mode by using one of the following methods.
• Keep pressing the lower end of the Volume Key when no media application is active to switch the phone to vibration mode. Press the key again in vibration mode to switch the phone to silent mode.
• From the home screen, select ☰ > Settings > Sound profiles and select Silent only or Vibrate only to switch to silent or vibration mode.
• From the home screen, press and hold the Vibration Mode Key to turn on or off vibration mode.
   NOTES:
• Silent and vibration modes will not silence your alarms.
• To instantly turn off an incoming call ringtone, press the Volume Key.
PERSONALIZING

APPLYING NEW WALLPAPERS
You can set the wallpaper for the home screen and the lock screen.
1. From the home screen, select 📱 > Settings > Device > Display > Wallpaper.
2. Select Gallery or Wallpapers.
3. For Gallery images, use the 4-way Navigation Key and the OK Key to select and open an album and then an image. For Wallpapers images, use the 4-way Navigation Key to select and preview the image.
   NOTE: For an image from Gallery, you can select the area you want to use by panning (using the 4-way Navigation Key) or zooming (using the Left Soft Key.)
4. Select Set wallpaper or Set. If prompted, select to set the wallpaper for the home screen, the lock screen, or both.

CHANGING THE SCREEN BRIGHTNESS
1. From the home screen, select 📱 > Settings > Device > Display > Brightness.
2. Press left or right on the 4-way Navigation Key to adjust the brightness.

PROTECTING YOUR PHONE WITH A SCREEN LOCK
You can protect your phone by creating a screen lock. When it is enabled, you need to enter a numeric PIN to unlock the phone.
1. From the home screen, select 📱 > Settings > Device > Security > Screen lock.
2. Select None to disable the screen lock, or PIN to set a numeric PIN that you must enter to unlock the phone.
   CAUTION: Remember the PIN you set. Otherwise, you will have to contact customer service and reflash your phone software to use the phone, and all data on your phone will be erased.

PROTECTING YOUR PHONE WITH ENCRYPTION
You can encrypt all the data on your phone: application data, music and other media, and so on. If you do, you must enter a numeric PIN each time you power on your phone.
   WARNING! Encryption is irreversible. The only way to revert to an unencrypted phone is to perform a factory data reset, which erases all your data.
Before turning on encryption, prepare as follows:
• Set a screen lock PIN.
• Charge the battery.
• Keep the phone connected to the charger.
• Schedule an hour or more for the encryption process. You must not interrupt it or you will lose some or all of your data.
PERSONALIZING

When you're ready to turn on encryption:
1. From the home screen, select  > Settings > Device > Security > Encrypt phone.
2. Read the information about encryption carefully.
   The ENCRYPT PHONE button is dimmed if your battery is not charged or your phone is not plugged in.
   **WARNING!** If you interrupt the encryption process, you will lose data.
3. Highlight ENCRYPT PHONE and press the OK Key.
4. Enter your screen lock PIN press the OK Key.
5. Highlight ENCRYPT PHONE and press the OK Key again.
   The encryption process starts. Encryption can take an hour or more and your phone may restart several times.
When encryption is completed, you’re prompted to enter your screen lock PIN. Subsequently you must enter your screen lock PIN each time you power on your phone to decrypt it.

KNOWING THE BASICS

PHONE STATUS ICONS

The status bar at the top of the home screen provides phone and service status icons on the right side. Below are some of the icons you may see.

ENTERING TEXT

Changing the Input Mode or Language

You can enter text using the following input modes: abc, Abc, ABC, T12 abc, T12 Abc, T12 ABC, and 123 (number input.)

When entering text, the current input mode is displayed on the right side of the status bar.

• To change the input mode, press and hold the Vibration Mode Key and select a text entry mode.
• To change the input language, press and hold the * Key.

Entering Letters (abc, Abc, and ABC Modes)

• Press a number key (2 Key through 9 Key) multiple times until the correct letter is shown on the screen. Press once to enter the first letter on the keypad, twice quickly to enter the second, and so on.
• Press the 0 Key to insert a space.
• Press the * Key to select a symbol.
• Press the Clear Key to delete the letter left of the cursor. Press and hold the key to delete all entered text left of the cursor.

NOTE: When using Abc mode, only the first letter will be capitalized. Then the entry mode will change to abc automatically.

Entering Numbers

In numeric (123) mode, you can enter numbers directly using the number keys.
Entering Symbols
1. Press the * Key.
2. Use the 4-way Navigation Key to select a symbol.
3. Press the OK Key.

Using Predictive Text
Predictive text mode (T12 abc, T12 Abc, and T12 ABC) is based on a built-in dictionary and generates words from the combination of letters pressed. Press once on each key that corresponds to the letters you want to enter. The letters appear on the display as they are entered. The list of candidate words changes as each key is pressed. Use the 4-way Navigation Key to highlight a candidate word, and then press the OK Key.

OPENING AND SWITCHING APPS

Opening an App
1. From the home screen, select 📲.
   
   NOTE: To return from another screen to the home screen, press the Power/End Key.
2. Use the 4-way Navigation Key to highlight an app.
3. Press the OK Key to open it.

Switching Between Recently Opened Apps
1. Press the Recent Apps Key. The apps you’ve used recently are displayed in a series of cards.
2. Press up or down on the 4-way Navigation Key to select a card.
3. Press the OK Key to open the card’s corresponding app.

NOTES:
- Press the Clear Key to remove a card or select Clear all to remove all cards and free the phone memory.
- Press the Recent Apps Key twice to quickly switch between the two most recent apps.
CONNECTING TO MOBILE NETWORKS

Selecting Preferred Network Type
1. From the home screen, select > Settings > Wireless & networks > Mobile network > Preferred network type.
2. Press up or down on the 4-way Navigation Key to highlight a network type and press the OK Key.

Selecting Preferred Network
1. From the home screen, select > Settings > Wireless & networks > Mobile network > Network operators and wait for the phone to search for available networks.
2. Press up or down on the 4-way Navigation Key to highlight a network and press the OK Key. Or select Choose automatically to use the default network.

Adding Access Point Names
You can use the default Access Point Names (APNs.) If you need to add a new APN, contact Consumer Cellular for the required information.
1. From the home screen, select > Settings > Wireless & networks > Mobile network > Access Point Names > Menu > New APN
2. Select each item to enter the required information. Then select Menu > Save.

NOTES:
• To use an APN, select the circle next to it in the APNs list and press the OK Key.
• To restore the default APNs, select Menu > Restore to default in the APNs list.

CONNECTING TO BLUETOOTH® DEVICES

Bluetooth is a short-range wireless communication technology. Phones or other devices with Bluetooth capabilities can exchange information wirelessly within a distance of about 30 feet (10 meters). The Bluetooth devices must be paired before the communication is performed.

Turning Bluetooth On/Off
1. From the home screen, select > Settings > Wireless & networks > Bluetooth.
2. Highlight the switch and press the OK Key to turn the switch on or off. When Bluetooth is on, the icon appears in the status bar. Your phone will remain visible to nearby devices while the Bluetooth menu is open.

Changing the Device Name
1. From the home screen, select > Settings > Wireless & networks > Bluetooth.
2. If Bluetooth is off, press the OK Key to turn the switch on.
3. Select Menu > Rename this device.
4. Edit the name and press the OK Key.
Pairing With Another Bluetooth Device

1. From the home screen, select Settings > Wireless & networks > Bluetooth.
2. If Bluetooth is off, press the OK Key to turn the switch on.
   Your phone automatically scans for and displays the IDs of available Bluetooth devices nearby. Select Menu > Refresh if you want to scan again.
3. Highlight the device you want to pair with and press the OK Key.
4. If necessary, confirm that the Bluetooth pairing code is the same between the two devices and press the OK Key. Alternatively, enter a Bluetooth pairing code and press the OK Key.
   Pairing is successfully completed when the other device accepts the connection or the same pairing code is entered.

   NOTE: The Bluetooth pairing code may be fixed for certain devices, such as headsets and hands-free car kits. You can try entering 0000 or 1234 (the most common pairing code), or refer to the manual for that device.

Forgetting a Bluetooth Device

You can make your phone forget its pairing connection with another Bluetooth device. To connect to the device again, you need to search for it and enter or confirm a pairing code again.

1. From the home screen, select Settings > Wireless & networks > Bluetooth and ensure that Bluetooth is turned on.
2. In the list of paired devices, select beside the Bluetooth device you want to forget.
3. Select Forget.

CONNECTING TO YOUR COMPUTER VIA USB

You can connect your phone to a computer with a USB cable and transfer music, pictures, and other files in both directions. Your phone stores these files in internal storage or on a removable microSDHC card.

Connecting Your Phone to a Computer via USB

1. Connect your phone to the computer with a USB cable.
2. The Connect to PC options menu will automatically open. Choose one of the following options:
   • Charge only: Charge your phone via USB.
   • Install driver: Install the driver needed for some USB connection modes (such as MTP). You only need to install the driver on the same PC once.
     NOTE: You can also install the driver on the PC by running the executable file in the new CD-ROM drive.
   • Media device (MTP): Transfer files on Windows® PC or Mac®.
     NOTE: For Windows XP, install the drivers and Windows Media® Player 11 (or later version) when you use MTP for the first time.

Disconnecting Your Phone From the Computer

To disconnect the phone from the computer, simply unplug the USB cable when you’re finished.
USING THE microSDHC CARD AS PORTABLE STORAGE

You can use your microSDHC card as portable storage for various files (such as photos and media).

To set the microSDHC card as the storage for your files:
1. From the home screen, select \( \text{Settings} \) > \( \text{System} \) > \( \text{Storage} \) > \( \text{Save location} \).
2. Highlight \text{SD card} and press the \text{OK Key}.

To erase and format the microSDHC card:
1. From the home screen, select \( \text{Settings} \) > \( \text{System} \) > \( \text{Storage} \) > \( \text{Erase SD card} \).
2. Press the \text{OK Key}.

CAUTION: The formatting procedure erases all the data on the microSDHC card, after which the files CANNOT be retrieved.

PHONE CALLS

You can place calls from Recent Calls, the Contacts app, or other apps that display contact information.

PLACING AND ENDING CALLS

Placing a Call by Dialing
1. From the home screen, use the keypad to enter the phone number or contact name. Press the \text{Clear Key} to delete incorrect digits.

   NOTE: As you enter the number or the contact name, your phone searches for contacts that match. If you see the number/contact you want to dial, highlight it.

2. Press the \text{Send Key} to dial the number you entered or you highlighted.

NOTES:

• To make an international call, press and hold the \text{* Key} to enter the plus (+) symbol. Next, enter the country code followed by the city/area code and then the phone number.
• To call an extension, enter the phone number, select \text{Menu} > \text{Add 2-sec pause} or \text{Add wait}, and then enter the extension number.
• For instructions on placing a call with RTT, see \text{Phone Calls – Using Real-Time Text (RTT) – Placing an RTT Call}.

Ending a Call
During a call, press the \text{Power/End Key}.
ANSWERING OR REJECTING CALLS

When you receive a phone call, you can answer or reject the call, or reject it with a text message.

Answering a Call

To answer an incoming call, press the **Send Key** or the **OK Key**.

**NOTES:**
- To silence the ringer before answering the call, press any key except the **Send Key**, the **OK Key**, the **Power/End Key** and the **Right Soft Key**.
- For instructions on answering a call with RTT, see **Phone Calls – Using Real-Time Text (RTT) – Answering an RTT Call**.
- You can also answer a call by opening the flip phone. See **Phone Calls – Adjusting Your Call Settings – Setting Phone Flip Actions**.

Rejecting a Call

To reject an incoming call, press the **Power/End Key** or the **Right Soft Key**. You can also select **Options > Message reject** to reject the call and select a preset text message or write one to send to the caller.

**NOTES:**
- To edit the preset text response, select **Settings > Wireless & networks > Call settings > Quick responses**.
- You can also reject a call by closing the flip phone. See **Phone Calls – Adjusting Your Call Settings – Setting Phone Flip Actions**.

USING REAL-TIME TEXT (RTT)

Your phone supports Real-Time Text. If you or the person on the other end of the line has a hearing or speech impairment, you can use RTT on top of a voice call for a real-time text conversation.

**NOTES:**
- You can use RTT only when the phone is connected to the 4G LTE network.
- Text conversation will be on pause when the RTT call is on hold.
- During an RTT emergency call, you cannot manually switch to a voice-only call.
- Some RTT features and settings may not be supported under or across different networks.

**Setting Up RTT Work Mode**

1. From the home screen, select **Settings > Wireless & networks > Call settings > RTT settings**.
2. Select **RTT operation mode** and choose one of the following to set when RTT options should be available.
   - **Visible during calls**: In this mode, calls will be placed and answered as voice-only calls by default unless you receive an incoming RTT call. You can still switch between RTT and voice-only during the calls. See **Phone Calls – Using Real-Time Text (RTT) – Switching Between RTT and Voice-only Call**.
   - **Always visible**: In this mode, you may set the default modes for outgoing calls and incoming calls.
3. When the RTT operation mode is set as **Always visible**, select **RTT on Outgoing Call** and **RTT on Incoming Call** to set the default modes for outgoing and incoming calls.
   - **RTT on Outgoing Call**: Place all outgoing calls as RTT calls automatically or choose manually every time before placing the call.
   - **RTT on Incoming Call**: Choose the function of the **OK Key** when there is an incoming voice-only call.

### Placing an RTT Call
When the RTT operation mode is set as **Always visible**, you can place an RTT call directly.
1. From the home screen, enter the phone number as normal.
2. Press the **Send Key**.
3. If RTT on Outgoing Call is set as **Manual**, select **RTT Voice call**.
   When the call is connected, the RTT message screen appears automatically.

### Answering an RTT Call
- Regardless of your RTT operation mode settings, an incoming RTT call is answered as an RTT call, with the RTT message screen appearing automatically.
  - **NOTE**: This feature may not work under or across different networks.
- If the RTT operation mode is set as **Always visible**, you can choose to answer incoming voice-only calls as RTT calls by pressing the **OK Key** or selecting **Options** > **Answer with RTT** (depending on the RTT on Incoming Call setting).

### Switching Between RTT and Voice-only Call
- During a voice-only call, select **Options** > **Switch to RTT call** to start an RTT conversation. The voice conversation will not be affected.
- While exchanging RTT messages, select **Options** > **Switch to voice call** to return to normal voice-only call.
- The other party can also switch between a voice-only call and an RTT call.
  - **NOTE**: Switching from RTT to voice-only calls need network support.

### Working with the Call History
The call history is a list of all the calls you’ve placed, received, or missed. It provides a convenient way to redial a number, return a call, or add a number to your Contacts.

To open the call history, press the **Send Key** from the home screen or select **Recent Calls**.

### Placing a Call From the Call History
1. Open the call history.
2. Highlight a listing and press the **Send Key**.
  - **NOTE**: Press left or right on the **4-way Navigation Key** to switch the type of calls: 📞 (missed), 📞 (outgoing), or 📞 (incoming.)
**Adding a Call History Number as a Contact**

1. Open the call history.
2. Select a phone number to view call details.
3. Select *Menu > Create new contact*, enter the contact details, and select *Save* or *Menu > Save*.
   - or -
   Select *Menu > Update existing contact*, select a contact from the list, edit the details as needed, and select *Save* or *Menu > Save*.

**Retrieving RTT Call Transcript**

1. Open the call history.
2. Select a listing with the RTT icon below the number.
3. In the call list, select a record with the RTT icon to check the call transcript.

**NOTE:** Select *Menu > Delete this RTT Call Log* to delete the transcript.

**Taking Other Actions on a Call History Entry**

1. Open the call history.
2. Select a listing to view call details.
3. Select *Menu* and choose from the following:
   - *Remove from call log*: Delete the call history entry.
   - *Edit number before call*: Edit the number in the dialer before placing the call.
   - *Send Message*: Send a message to the contact or number.

**NOTE:** To delete all history records, open the call history and select *Menu > Clear call log > OK*.

---

**CALLING YOUR CONTACTS**

1. From the home screen, select ☎ > ☎:
2. Highlight a contact listing, and then press the *Send Key* to place the call. If the contact has more than one number, select the number you want to dial and press the *Send Key*.

**NOTE:** To use a number as default, highlight *Remember this choice* and press the *OK Key* before selecting the number to dial.
3. If prompted, select *RTT Voice call* or *Voice call*.

**CHECKING VOICEMAIL**

If you have set the phone to divert calls to voicemail, callers can leave messages when they cannot reach you. Here’s how to check the messages they left.

1. From the home screen, press and hold the 1 Key on the keypad.
2. If prompted, use the keypad to enter your voicemail password.
3. Follow the voice prompts to listen to and manage your voicemail messages.

**NOTE:** See *Phone Calls – Adjusting Your Call Settings – Setting Up Voicemail* for how to set your voicemail service. For detailed information, please contact Consumer Cellular.
USING OPTIONS DURING A CALL

You can use the following options during a call:

- Press the **OK Key** to turn the speakerphone on or off.
- Press the **Right Soft Key** during a voice-only call to mute or unmute the microphone.
- Press the **Left Soft Key** for **Options**, and then select an option:
  - **Mute**: Mute the microphone during an RTT call.
  - **Hold**: Put the call on hold.
  - **Add call**: Make another call separately from the first call, which is put on hold.
  - **Contacts**: Open the Contacts app.
  - **Switch to RTT call**: Switch from a voice-only call to an RTT call.
  - **Switch to voice call**: Switch from an RTT call to a voice-only call.
  - **Open App Menu**: Open the apps list.
  - **Swap**: Put the current call on hold, and switch to the other call.
  - **Merge calls**: Merge separate calls into a single conference call.
  - **Show DTMF Keypad / Hide DTMF Keypad**: Use the keypad to interact with automated systems with DTMF tones or enter texts during RTT calls.
  - **End Call**: End the current call.

**WARNING!** Because of higher volume levels, do not place the phone near your ear during speakerphone use.

**NOTE:** Some options may not be available without network support.

MANAGING MULTI-PARTY CALLS

When the call waiting and three-way call features are available, you can switch between two calls or set up a conference call.

**NOTE:** The call waiting and three-way call features need network support and may result in additional charges. Please contact Consumer Cellular for more information.

**Switching Between Current Calls**

When you’re on a call and another call comes in, your phone screen informs you and displays the caller ID.

To respond to an incoming call while you’re on a call:

- Select **Hold current and answer** to answer the call. The first caller is placed on hold.
- Select **End current and answer** to end the first call and answer the second call.
- Press the **Power/End Key** or the **Right Soft Key** to reject the second call.
- Select **Options > Message reject** to reject the second call and select a preset text message or write one to send to the caller.
- If the RTT operation mode is set as **Always visible**, you can choose to answer incoming voice calls as RTT calls. See **Phone Calls – Using Real-Time Text (RTT) – Answering an RTT Call**.

To switch between two calls:

After you answer the second call and put the first call on hold, select **Options > Swap** to switch between the calls.
**Setting Up a Conference Call**

With this feature, you can talk to two people at the same time.

1. Place the first call.
2. Once you have established the connection, select **Options > Add call** and dial the second number. This puts the first caller on hold.
3. When you're connected to the second party, select **Options > Merge calls**.

If one of the people you called hangs up during the call, you and the remaining caller stay connected. If you initiated the call and are the first to hang up, all callers are disconnected.

To end the conference call, press the **Power/End Key**.

**NOTE:** RTT is not supported for conference calls. RTT calls are switch to voice-only calls when you merge calls.

---

**ADJUSTING YOUR CALL SETTINGS**

You can configure a number of call settings.

**NOTE:** Available options depend on the network. Some features need network support and may result in additional charges. Please contact Consumer Cellular for more information.

**Setting Speed Dials**

You can press and hold the **1 ~ 9 Keys** from the home screen to call the corresponding speed dial number.

The **1 Key** is reserved to speed dial your voicemail.

---

**PHONE CALLS**

To assign a speed dial key:

1. From the home screen, select 📱 > **Settings > Wireless & networks > Call settings > Speed dial**.
2. Select a speed dial entry.
3. Select a number from the contact list.

**Setting Up Voicemail**

1. From the home screen, select 📱 > **Settings > Wireless & networks > Call settings > Carrier Setting > Voicemail**.
2. Select from the following voicemail settings:
   - **Service:** Select the voicemail service provider. Your carrier is the default.
   - **Setup:** View the voicemail number; if needed, select **Voicemail number** to edit it.
   - **Sound:** Select the notification sound for new voicemails.
   - **Vibrate:** Enable or disable vibration for notification.

**Forwarding Incoming Calls**

The call forwarding feature allows you to forward your incoming calls to another phone number.

1. From the home screen, select 📱 > **Settings > Wireless & networks > Call settings > Carrier Setting > Call forwarding**.
2. Select an available option to enable or disable it.
Setting Caller ID
Choose whether your number is displayed when someone receives your outgoing call.
1. From the home screen, select > Settings > Wireless & networks > Call settings > Carrier Setting > Additional settings.
2. Select Caller ID and select an option.

Setting Call Waiting
This option allows you to get notified of incoming calls during a call.
1. From the home screen, select > Settings > Wireless & networks > Call settings > Carrier Setting > Additional settings.
2. Select Call waiting to enable or disable this feature.

Using Fixed Dialing Numbers
Fixed Dialing Numbers (FDN) allows you to restrict outgoing calls to a limited set of phone numbers.
1. From the home screen, select > Settings > Wireless & networks > Call settings > Fixed Dialing Numbers.
2. Set the following options:
   • Enable FDN: Input the PIN2 code to enable the FDN feature.
   • Change PIN2: Change the PIN2 code for FDN access.
   • FDN list: Manage the FDN list.

NOTE: The PIN2 code is provided by your carrier. Entering an incorrect PIN2 code more times than allowed can get your nano-SIM card locked. Contact Consumer Cellular for assistance.

Setting Phone Flip Actions
You can answer or end/reject a call simply by opening or closing the phone flip.
1. From the home screen, select > Settings > Wireless & networks > Call settings.
2. Select Open to answer or Close to end call to enable or disable the function.

Setting Real-Time Text (RTT) Options
From the home screen, select > Settings > Wireless & networks > Call settings > RTT settings. For details, see Phone Calls – Using Real-Time Text (RTT) – Answering an RTT Call.

Setting Hearing Aids
Your phone supports Hearing Aid Compatibility (HAC) function. When you turn on the hearing aid compatibility and use a hearing aid with a telecoil to answer the phone, it will help you hear more clearly during the phone call.
1. From the home screen, select > Settings > Wireless & networks > Call settings.
2. Select Hearing aids to enable or disable hearing aid compatibility.

CAUTION: Do not turn on the Hearing aids option unless you use a hearing aid with a telecoil. Using this setting without a hearing aid or with a hearing aid without a telecoil may be harmful to your hearing.
Setting DTMF Tones
You can set the length of dual-tone multi-frequency (DTMF) signal tones.
1. From the home screen, select 📱 > Settings > Wireless & networks > Call settings > DTMF tones.
2. Select Normal or Long.

Setting Auto Answer
You can set the phone to answer calls automatically when a headset or Bluetooth device is connected.
1. From the home screen, select 📱 > Settings > Wireless & networks > Call settings > Auto answer.
2. Select Auto answer to enable or disable this feature.
3. When Auto answer is enabled, you can set the following options:
   - Call duration: Set the wait time before the phone answers the call.
   - Auto answer conditions: Set whether the phone will answer automatically only when a headset is connected, when a Bluetooth device is connected, or either.

Editing Quick Responses to Rejected Callers
1. From the home screen, select 📱 > Settings > Wireless & networks > Call settings > Quick responses.
2. Select a message to edit and press the OK Key to save.

CONTACTS
To see your contacts, press the Left Soft Key from the home screen to select 📞. From there, you can press right on the 4-way Navigation Key to view contact groups 📘; press left to return to the contact list 📞.

ADDING A NEW CONTACT
1. From the home screen, select 📞 → 📞.
2. Select Menu > New contact.
3. Enter the contact name, phone numbers, email addresses, and other information. Use the 4-way Navigation Key to switch between each field.
   NOTE: To set a special ringtone for calls or notifications from the contact, select the RINGTONE or NOTIFICATION RINGTONE field. Scroll through the list of available ringtones, highlight the one you want to use, and press the OK Key.
4. To enter more information, select ADD ANOTHER FIELD at the bottom and then select the information you need.
5. Select Menu > Save to save the contact.

SETTING UP YOUR OWN PROFILE
You can create your own name card in your phone.
1. From the home screen, select 📱 → 📎.
2. Select Set up my profile.
3. Enter your profile information.
4. To enter more information, select **ADD ANOTHER FIELD** at the bottom and then select the information you need.
5. Select **Menu > Save**.

**IMPORTING, EXPORTING, AND SHARING CONTACTS**

You can import/export contacts from/to your nano-SIM card, the phone storage, or an installed microSDHC card. This is especially useful when you need to transfer contacts between different devices. You can also quickly share contacts using Messages or Bluetooth.

**Importing Contacts From the nano-SIM Card**
1. From the home screen, select 📱.
2. Select **Menu > Import/Export > Import from SIM card**.
3. Select **Menu > Select all**, or highlight each contact you need and press the **OK Key** to select it.
   
   **NOTE:** To deselect a contact, highlight it and press the **OK Key** again.
4. Select **Menu > Done**.

**Importing Contacts From the Phone Storage or microSDHC Card**
1. From the home screen, select 📱.
2. Select **Menu > Import/Export > Import from storage**.
3. If prompted, choose to import one, multiple, or all vCard files.
4. If prompted, select the vCard file(s) to import and press the **OK Key**.

**Exporting Contacts to the nano-SIM Card**
1. From the home screen, select 📱.
2. Select **Menu > Import/Export > Export to SIM card**.
3. Select **Menu > Select all**, or highlight each contact you need and press the **OK Key** to select it.
   
   **NOTE:** To deselect a contact, highlight it and press the **OK Key** again.
4. Select **Menu > Done**.

**Exporting Contacts to the Phone Storage or microSDHC Card**
1. From the home screen, select 📱.
2. Select **Menu > Import/Export > Export to storage**.
3. The phone will prompt you with the name of the vCard file and the directory in which the file will be saved. Press the **OK Key** to create the file.

**Sharing Contacts**
1. From the home screen, select 📱 > 📲.
2. Select **Menu > Multi-Select**.
3. Select **Menu > Select all**, or highlight each contact you need and press the **OK Key** to select it.
   
   **NOTE:** To deselect a contact, highlight it and press the **OK Key** again.
4. Select **Menu > Share**.
5. Select how to share the contacts: **Messaging** or **Bluetooth**.
6. The phone will export the selected contacts into a vCard file. Follow the prompts to send the vCard file.

**NOTE:** To share all visible contacts, from the home screen, select > Menu > Import/Export > Share visible contacts.

**WORKING WITH GROUPS**

**Viewing Your Contact Groups**
1. From the home screen, select > .
2. Scroll through the list to view the preset groups and groups you have created.
3. Select a group to view its members.

**NOTE:** To send a message to a group’s members, select the group and then select Menu > Send Group message.

**Setting Up a New Group**
1. From the home screen, select > .
2. Select Menu > Create group.
3. Enter a name in the Group’s name field.
4. Move down to the MEMBER field and press the OK Key to select the contacts you want to add to the group.
5. Select Menu > Add member to group.
6. Move down to the RINGTONE field and press the OK Key.

7. Highlight the ringtone you want to use for incoming calls from the group members, and then press the OK Key.

8. Select Menu > Save to save the group.

**Deleting a Group**
1. From the home screen, select > .
2. Select the group you want to delete.
4. Press the OK Key to disband the group. The contacts in the group will not be deleted.

**Editing a Group**
1. From the home screen, select > .
2. Select the group you want to edit.
3. Select Menu > Edit group.
4. Enter a new group name, or select the MEMBER or RINGTONE field to add members or change the ringtone.
5. Select Menu > Save.

**NOTE:** To remove group members, select a group and then select Menu > Multi-Select. Select the contacts you want to remove, and then select Menu > Delete member > OK.
SEARCHING FOR A CONTACT
1. From the home screen, select < > .
2. Input the contact name or phone number you want to search for. Matching contacts will be listed.

SETTING A RINGTONE FOR A CONTACT
Assign a special ringtone to a contact, so you know who is calling when you hear the ringtone.
1. From the home screen, select < > .
2. Select the contact you want to set a ringtone for.
3. Select Menu > Edit.
4. Press down on the 4-way Navigation Key to highlight the RINGTONE field.
5. Select Default and then highlight a ringtone you like.
6. Press the OK Key and select Menu > Save.

JOINING DUPLICATE CONTACTS
If your phone has duplicate entries for the same contact. You can merge all the separate information of a contact into one entry in the Contacts list.
1. From the home screen, select < > .
2. Select the contact you want to join with a duplicate.
3. Select Menu > Edit > Menu > Join.
4. Highlight the duplicate contact and press the OK Key.
5. Select Save or Menu > Save.

SEPARATING CONTACT INFORMATION
If contact information from different sources was joined in error, you can separate the information back into individual contacts on your phone.
1. From the home screen, select < > .
2. Select the contact you have merged.
3. Select Menu > Edit > Menu > Separate > OK.
MESSAGES

You can use Messages to exchange text messages (SMS) and multimedia messages (MMS).

OPENING THE MESSAGING SCREEN

From the home screen, press the **Right Soft Key** to select 📬. The Messaging screen opens, where you can create a new message or open an ongoing message thread.

- Select **Menu > New message** to write a new text or multimedia message.
- Select an existing message thread to open the conversation.

SENDING A MESSAGE

1. On the Messaging screen, select **Menu > New message**.
2. In the To field, add recipients:
   - With the keypad, enter the recipient’s number or the contact name. If the phone suggests matching contacts, select one to add it.
   - Press the **OK Key** to select recipients from your Contacts or call history.
   **NOTE:** To remove a recipient, press the **Clear Key**.
3. Move down to the input text field and enter the content of your message.
4. To send a multimedia message, select **Menu > Insert attach** to add a file to the message.
5. Press the **OK Key** to send the message.

NOTE:
- You can also include email addresses as recipients for multimedia messages.
- Do not add any attachment if you want to send a text message. Otherwise you may be charged for a multimedia message.

REPLYING TO A MESSAGE

Messages you receive are appended to existing threads of the same number. If the new message comes from a new number, a new thread is created.

1. On the Messaging screen, select the thread that has the message you want to reply to.
2. Enter your reply in the input text field. To reply with an MMS, you can select **Menu > Insert attach** to add a file.
3. Press the **OK Key** to send the message.

FORWARDING A MESSAGE

1. On the Messaging screen, select the thread that has the message you want to forward.
2. Press up or down on the 4-way Navigation Key to highlight the message.
3. Press the **OK Key** and select **Forward**.
4. Enter a recipient. Edit the content if necessary.
5. Press the **OK Key** to send the message.
MESSAGES

DELETING MESSAGES OR THREADS
1. On the Messaging screen or after you open a thread, select Menu > Multi-Select.
2. Select the threads or messages you want to delete.
3. Select Menu > Delete > OK.

CALENDAR

To open Calendar, from the home screen, select 📅 > Calendar.

VIEWING YOUR CALENDAR AND EVENTS

Changing Calendar Views
You can view your calendar in month, week, or agenda view. To change the view, select Menu > View by and select a view.
- In Month view, scroll up and down to see past and future months.
- In Week or Agenda view, scroll left and right to see past and future weeks or days.
- In any view, select Menu > Today to quickly switch to today.
- To quickly switch to a specific date, select Menu > Go to date, select the date you want, and press the OK Key.

Viewing Event Details
In Month view, select a date to switch to Agenda view and check the agenda of that day. Then select an event to view its details.
In Week view, select a time block to check the event details.
CREATING AN EVENT
1. In any Calendar view, select Menu > New event.
   NOTE: In Week view, you can also select an free time block to add an event.
2. Enter the event details, including event name, location, description, time, repetition, and reminders.
3. Press the OK Key to save the event.

EDITING, DELETING, OR SHARING AN EVENT
1. Find and select the event you want to edit, delete, or share (see Calendar – Viewing Your Calendar and Events – Viewing Event Details).
2. From the event details screen, select Menu and then an option:
   • To edit the event, select Edit. Press the OK Key to save your changes.
   • To delete the event, select Delete > OK.
   • To share the event, select Share and choose an option.

CHANGING CALENDAR SETTINGS
To change Calendar settings, open any Calendar view (Week, Month, or Agenda) and select Menu > Settings > General settings. You can choose to show the week number or set the first day of every week.

CAMERA
You can take photos and record videos with the Camera app. Photos and videos are stored to the phone’s microSDHC card or to the phone’s internal storage. You can copy them to your computer or access them in the Gallery app.

CAPTURING A PHOTO
1. From the home screen, press the Camera Key or select > Camera.
2. Aim the camera at the subject. To make adjustments, select Menu and choose an option:
   • Filter: Choose a filter effect for the photo.
   • White balance: Select a lighting option to adjust the white balance.
   • Brightness: Set the brightness for the photo.
   • ISO: Set the light sensitivity.
   • Settings: Adjust camera settings (see Camera – Customizing Camera Settings.)
   NOTE: Press the Volume Key to zoom in or out.
3. Press the OK Key or the Camera Key to take a picture.
CAMERA

RECORDING A VIDEO

1. From the home screen, press the Camera Key or select ☞ > Camera.
2. Press left on the 4-way Navigation Key to switch to the video recorder.
3. Aim the camera at the subject and make any necessary adjustments.

   NOTE: You can press the Volume Key to zoom in or out before and during recording.
4. Press the OK Key or the Camera Key to start recording. You can press the Left Soft Key to pause and resume recording.
5. Press the OK Key or the Camera Key again to stop recording.

CUSTOMIZING CAMERA SETTINGS

Before capturing a photo or a video, you can select Menu > Settings to manage the following options:

- Picture size: Set the photo resolution.
- Video quality: Set the quality for your video.
- Shutter tone: Turn the shutter tone on or off.
- Photo auto review: Turn auto review on or off. When this feature is on, the phone will display each photo after it is taken.
GALLERY

OPENING THE GALLERY
From the home screen, select 📥 > Gallery to view albums of your pictures and videos.

WORKING WITH ALBUMS
When you open Gallery, all pictures and videos on your phone are displayed in a number of albums. Scroll up and down to see them all.

Viewing Album Contents
Select an album to view the pictures and videos it contains.

Sharing Pictures or Videos
1. Open an album.
2. Select ☐️ > Multi-Select.
3. Highlight each item you want to share, and press the OK Key to select it.
4. Select ☐️ > Share and select a sharing option.

Deleting Albums, Pictures, or Videos
1. Open the Gallery to view your albums, or open an album.
2. Select ☐️ > Multi-Select.
3. Highlight each item you want to delete, and press the OK Key to select it.
4. Select ☐️ > Delete > OK.

WORKING WITH PICTURES
Open an album and select a picture to view it.

Press the Left Soft Key to view options for the current picture: delete, share, view details, set as wallpaper or contact photo, or view album as a slideshow.

Press the Right Soft Key to return to the album.

Press the OK Key to view the picture in full screen.

NOTE: Press left or right on the 4-way Navigation Key to browse other pictures and videos in the album.

PLAYING VIDEOS
1. Open an album.
2. Select a video.
3. Press the OK Key to play the video.
MUSIC

From the home screen, select 📱 > Multimedia > Music to play audio files stored on your phone or microSDHC card (if one is installed.)

VIEWING YOUR MUSIC LIBRARY

Open Music and your music library is displayed. All your audio files are categorized according to artist and album. You can also select All Songs or Playlists to see all the audio files or the playlists you have created.

NOTE: If a track is being played, select Now Playing to open the playback screen.

PLAYING MUSIC

Select a song in the music library to listen to it. The following playback screen will appear.

- To pause or resume playback, press the OK Key.
- To play the previous song, press left on the 4-way Navigation Key.
- To skip to the next song, press right on the 4-way Navigation Key.
- To rewind, press and hold left on the 4-way Navigation Key.
- To fast-forward, press and hold right on the 4-way Navigation Key.
MANAGING PLAYLISTS

Create playlists to organize your music files into sets of songs, so that you can play the songs you like in the order you prefer.

• From any music library category, highlight a song and select \( \text{Add to playlist} \) to add the song to a playlist or create a new playlist.

• From the music library, select \( \text{Playlists} \), highlight a playlist and select \( \text{Rename} \) or \( \text{Delete} \) > OK to rename or delete the playlist.

• Open a playlist and select \( \text{Add Songs} \) to add more songs to the playlist, or highlight a song and select \( \text{Remove} \) to delete it from the playlist.

VIDEO

Use the Video app to manage your video library and to watch videos.

OPENING THE VIDEO LIBRARY

From the home screen, select \( \text{Multimedia} \) > \( \text{Video} \). Scroll up or down to view the video files.

PLAYING AND CONTROLLING VIDEOS

Open the Video app and select a video to play it. From the video playback screen, you can control playback or manage the video.

Press the Left Soft Key to view options for the current video: delete, adjust brightness, share, or view details.

Press the Right Soft Key to return to the video library.

Playback control (details below)
VIDEO
- To pause or resume playback, press the OK Key.
- To play the previous video, press left on the 4-way Navigation Key.
- To skip to the next video, press right on the 4-way Navigation Key.
- To rewind, press and hold left on the 4-way Navigation Key.
- To fast-forward, press and hold right on the 4-way Navigation Key.

DELETING OR SHARING VIDEO FILES
1. In the video library, select ☐ > Multi-Select.
2. Highlight each video you want to delete or share, and press the OK Key to select it.
3. Select ☐ > Delete > OK to delete or ☐ > Share and choose an option to share.

FM RADIO
With the FM Radio, you can search for radio channels, listen to them, and save them on your phone. Note that the quality of the radio broadcast depends on the coverage of the radio station in your area. The wired headset works as an antenna, so always connect the headset when using the radio.

SCANNING AND SAVING CHANNELS
1. Plug in a wired headset.
2. From the home screen, select ☐ > FM Radio.
3. The first time you open the FM Radio app, it will automatically scan for channels and display the All channels list. To scan again, select Menu > Scan.
NOTE: To view saved channels, select Menu > All channels from the main FM Radio screen.

LISTENING TO FM RADIO
1. Open FM Radio while the headset is connected.
2. Select a channel to listen.
   - Select Menu > All channels, and then select a saved channel.
   - Use the 4-way Navigation Key to tune the radio frequency. Press up or down to adjust the frequency; press left or right to switch to another station.
OTHER OPTIONS AND SETTINGS

To set the FM frequency range:
FM radio frequency ranges differ in different regions.
From the main FM Radio screen, select Menu > FM frequency range and select the range you need.

NOTE: If you change the frequency range, previously saved channels will not be displayed until you switch back to the original frequency range.

To turn off FM radio:
From the main FM Radio screen, select Menu > Exit.

To delete a saved channel:
1. From the main FM Radio screen, select Menu > All channels.
2. Highlight a channel, and then select Menu > Delete > Ok.

SOUND RECORDER

Sound Recorder enables you to record and listen to voice memos.

RECORDING A VOICE MEMO
1. From the home screen, select Multimedia > Sound Recorder.
2. Press the OK Key to start recording.
   
   NOTE: During recording, press the OK Key to pause or resume.
3. Press the Left Soft Key to stop recording. The memo is automatically saved.

PLAYING A VOICE MEMO
1. From the main Sound Recorder screen, select All Recordings.
2. Highlight a file and press the OK Key to play it.
   
   NOTE: Highlight a file and press the Left Soft Key to share, delete, or rename the memo or view the file details.
MORE APPS

CALCULATOR
1. From the home screen, select Tools > Calculator.
2. Use the keypad to enter numbers and the 4-way Navigation Key to choose operators for your equation.
3. The answer is displayed automatically. You can press the OK Key to use the answer to start a new calculation.

NOTES:
• Press the Clear Key to clear an input or result.
• Press the Left Soft Key to reset the calculator.
• Press the * Key to enter a decimal point.
• Press the Vibration Mode Key to switch between positive and negative numbers.

CLOCK
From the home screen, select Clock. The Clock app allows you to check local time in places around the world, set alarms, and use timers.

Setting a New Alarm
1. Open the Clock app and select the Clock tab.
2. Highlight an existing alarm and select Menu > Edit to configure it, or select Menu > New alarm to create a new one.
3. Set the alarm options: time, alarm days, repeat, snooze, and ringtone.
4. Press the Left Soft Key to save the alarm.

NOTE: To turn an existing alarm on or off without editing it, highlight the alarm and press the OK Key.

Checking World Time
1. Open the Clock app and select the Clock tab.
2. World time lets you check local times for cities around the world. Select Menu > Add City to add a new city.

Using Stopwatch and Countdown
1. Open the Clock app and select the Clock or Timer tab.
2. Use the stopwatch to record lap times, or use the countdown feature to set a time and count down to zero.
FILE MANAGER
Quickly access all of your images, videos, audio clips, and other types of files on your phone and on the microSDHC card.
From the home screen, select > File Manager. If a microSDHC card is installed, press left or right on the 4-way Navigation Key to switch between the phone storage or the microSDHC card.
• Highlight a folder or file and press the OK Key to open it.
• Highlight an item and select for more options.
• Select > Multi-Select to select multiple items to delete, copy, or move.
• Select > New folder to create a new folder in the current directory.
• To copy or move an item, navigate to a new location and select > Paste.

SETTINGS
From the home screen, select > Settings. The Settings app contains most of the tools for customizing and configuring your phone.

SOUND PROFILES
Select Settings > Sound Profiles. Highlight the sound profile you want to use (Sound, Silent only, or Vibrate only), and press the OK Key to select it.
You can edit the settings of the Sound profile. To do so, highlight Sound and press the Left Soft Key. You can adjust different types of volume (see Personalizing – Adjusting Volumes), set the ringtone and notification sound (see Personalizing – Changing the Ringtone and Notification Sound), and manage system sounds (see Personalizing – Turning System Sounds On/Off).

WIRELESS & NETWORKS
Airplane Mode
Select Settings > Wireless & networks > Airplane mode to turn airplane mode on or off. All the phone’s radios (mobile network, Bluetooth, and GPS) are turned off when airplane mode is on.
Bluetooth
Select Settings > Wireless & networks > Bluetooth. Turn Bluetooth on or off and configure your Bluetooth connections (see Connecting to Networks and Devices – Connecting to Bluetooth® Devices.)
Mobile Network
Select Settings > Wireless & networks > Mobile network to select the network type or operator and set access point names (see Connecting to Networks and Devices – Connecting to Mobile Networks.)

Call Settings
Select Settings > Wireless & networks > Call settings to configure calling options (see Phone Calls – Adjusting Your Call Settings.)

DEVICE

Display
Select Settings > Device > Display to configure the following options.
• Brightness level: Set the brightness of the display.
• Wallpaper: Select a background image for the home screen, the lock screen, or both.
• Sleep: Set the length of time of inactivity before the screen turns off automatically.
• Keypad light: Set how long the keypad backlight should be on when you are not pressing any keys.
• Font size: Set the font size of the text on the screen.

Date & Time
Select Settings > Device > Date & time to set date, time, time zone, and the time format. You can also use network-provided data (see Personalizing – Setting the Date and Time).

Navigation Key Shortcuts
Select Settings > Device > Navigation key shortcuts to assign each direction (up, down, left, and right) on the 4-way Navigation Key as a shortcut to a specific function.

Languages & Input
Select Settings > Device > Languages & input to configure options related to system language and input methods.
• Languages: Select a language for your system.
• Keyboard & inputs: Configure text input settings.

Location
Select Settings > Device > Location to manage location services, which help your phone and apps determine your location. To use location-related applications, you must have location services enabled on your phone.
• Select Off or On to turn location services on or off.
• Select Mode to choose location sources you want to use: To get your accurate location, choose High accuracy. To save battery power and get approximate location, choose Battery saving. To use only GPS to pinpoint your location, choose Device only.
• Select Scanning > Bluetooth scanning to enable or disable location improvement by allowing your phone to detect Bluetooth devices at any time.
Security
Select **Settings > Device > Security** to configure options that help keep your phone and data safe.

- **Screen lock:** Secure your phone and personal information with a screen lock (see *Personalizing – Protecting Your Phone With a Screen Lock.*)
  
  When a screen lock PIN is set, select  beside **Screen lock** to set the following options.
  
  - **Automatically lock:** Set the time needed for the lock protection to be activated after the screen turns off.
  - **Lock screen message:** Set the text to be displayed on the lock screen.

- **SIM card lock:**
  
  - **Lock SIM card:** Activate or deactivate the PIN lock to require PIN before accessing the nano-SIM card.
  - **Change SIM PIN:** Change the PIN used to access the nano-SIM card.

  **NOTE:** Put all your confidential passwords in a safe place for future use. If you enter the wrong SIM PIN more times than allowed, your nano-SIM card will be locked and you cannot access the mobile phone network. Contact Consumer Cellular for a PIN Unlock Key (PUK) to restore the nano-SIM card.

- **Encrypt phone:** Encrypt your data on the phone to protect your privacy (see *Personalizing – Protecting Your Phone With Encryption.*)

Reset Options
Select **Settings > Device > Reset options** to reset the Bluetooth setting or the phone to factory status.

SYSTEM

Storage
Select **Settings > System > Storage** to view the memory information of the internal phone storage and the microSDHC card (if one is installed).

- **Saving location:** Select **Phone** or **SD card** as the default location for new data, such as photos captured and voice recorded.
- **Erase SD card:** Erase all data on the installed microSDHC card and prepare it for use with your phone.
- **Internal shared storage:** View usage information of the internal phone storage.
- **SD card:** View usage information of the microSDHC card (if one is installed.)

Connect to PC
Select **Settings > System > Connect to PC**. You can select the USB connection mode after you connect your phone to a computer with a USB cable (see *Connecting to Networks and Devices – Connecting to Your Computer via USB.*)

Accessibility
Select **Settings > System > Accessibility** to configure accessibility plug-ins and services on your phone.

About Phone
Select **Settings > System > About phone** to view important phone information and legal information. You can select **Storage card updates** to update the phone software from update packages copied to the memory card.
### TROUBLESHOOTING

If you encounter problems while using the phone, or if it performs abnormally, you can refer to the chart below. If your particular problem cannot be resolved using the information in the chart, contact Consumer Cellular customer support at (800) 686-4460.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes</th>
<th>Possible solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor reception</td>
<td>The network signal is too weak at your current location (for example, in a basement or near a tall building) because wireless transmissions cannot effectively reach it.</td>
<td>Move to a location where the network signal can be properly received.</td>
</tr>
<tr>
<td></td>
<td>The network is busy at the current time (for example, during peak times, there may be too much network traffic to handle additional calls).</td>
<td>Avoid using the phone at such times, or try again after waiting a short time.</td>
</tr>
<tr>
<td></td>
<td>You are too far away from a tower for your service provider.</td>
<td>You can request a service area map from your service provider.</td>
</tr>
<tr>
<td>Echo or noise</td>
<td>The network link quality is poor on the part of your service provider.</td>
<td>End the call and dial again. You may be switched to a better-quality network link or phone line.</td>
</tr>
<tr>
<td></td>
<td>The quality of the phone line that you are calling is poor.</td>
<td>End the call and dial again. You may be switched to a better-quality network link or phone line.</td>
</tr>
<tr>
<td>Unable to select certain features</td>
<td>Your service provider does not support these features, or you have not applied for services that provide these features.</td>
<td>Call Consumer Cellular customer support at (800) 686-4460.</td>
</tr>
<tr>
<td>Cannot charge the battery</td>
<td>The battery or battery charger is damaged.</td>
<td>Call Consumer Cellular customer support at (800) 686-4460.</td>
</tr>
<tr>
<td></td>
<td>The phone’s temperature is below 32°F (0°C) or higher than 95°F (35°C).</td>
<td>Adjust the battery charging environment to avoid extreme temperatures.</td>
</tr>
<tr>
<td></td>
<td>The contact between the charging jack and charger is poor.</td>
<td>Check all connectors to ensure that all connections have been properly made.</td>
</tr>
<tr>
<td>Problem</td>
<td>Possible causes</td>
<td>Possible solution</td>

### FOR YOUR SAFETY

#### GENERAL SAFETY

- Don’t make or receive handheld calls while driving. Never text while driving.
- Keep your phone at least 15 mm away from your body while making calls.
- Small parts may cause choking.
- Your phone can produce a loud sound.
- Avoid contact with anything magnetic.
- Keep away from pacemakers and other electronic medical devices.
- Power off when asked to in hospitals and medical facilities.
- Power off when told to on aircraft and at airports.
- Power off when near explosive materials or liquids.
- Don’t use at gas stations.
- Your phone may produce a bright or flashing light.
- Don’t dispose of your phone in fire.
- To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your phone near your ear while the loudspeaker is in use.
- Avoid extreme temperatures.
- Avoid contact with liquids. Keep your phone dry.
- Do not attempt to disassemble your phone.
- Only use approved accessories.
- Don’t rely on your phone as a primary device for emergency communications.
FCC RF EXPOSURE INFORMATION (SAR)

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States. During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 0.6 inches (15 mm). Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.

This device is complied with SAR for general population/uncontrolled exposure limits in ANSI/IEEE C95.1-1992 and had been tested in accordance with the measurement methods and procedures specified in IEEE1528. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: SRQ-Z2332CC.

For this device, the highest reported SAR value for usage against the head is 0.60 W/kg, and for usage near the body is 1.18 W/kg.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements. SAR compliance for body-worn operation is based on a separation distance of 0.6 inches (15 mm) between the unit and the human body. Carry this device at least 0.6 inches (15 mm) away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 0.6 inches (15 mm) between this device and your body. RF exposure compliance with any body-worn accessory that contains metal was not tested and certified, and use of such body-worn accessory should be avoided.

FCC REGULATIONS

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Contact Consumer Cellular at (800) 686-4460.

CAUTION: Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

HEARING AID COMPATIBILITY (HAC) REGULATIONS FOR MOBILE PHONES

In 2003, the FCC adopted rules to make digital wireless telephones compatible with hearing aids and cochlear implants. Although analog wireless phones do not usually cause interference with hearing aids or cochlear implants, digital wireless phones sometimes do because of electromagnetic energy emitted by the phone’s antenna, backlight, or other components. Your phone is compliant with FCC HAC regulations (ANSI C63.19-2011).

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise and phones also vary in the amount of interference they generate. The wireless telephone industry has developed a rating system for wireless phones to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box. These ratings are not guaranteed. Results will vary, depending on the level of immunity of your hearing device and the degree of your hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.
T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device’s telecoil (“T Switch” or “Telephone Switch”) than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices contain telecoils.)

Your phone has been tested for hearing aid device compatibility and has an M4/T4 rating.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. For more information about FCC Hearing Aid Compatibility, please go to [https://www.fcc.gov/general/disability-rights-office](https://www.fcc.gov/general/disability-rights-office).

**CTIA REQUIREMENTS**

- Do not disassemble or open, crush, bend or deform, puncture or shred the battery.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazards.
- Only use the battery for the device for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirements for Battery System Compliance to IEEE 1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage or other hazards.
- Do not short-circuit a battery or allow metallic conductive objects to contact the battery terminals.

- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazards. Only authorized service providers shall replace the battery. (If the battery is non-user replaceable).
- Promptly dispose of used batteries in accordance with local regulations.
- Battery usage by children should be supervised.
- Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
- Improper battery use may result in a fire, explosion or other hazards.
- The phone shall only be connected to CTIA certified adapters, products that bear the USB-IF logo or products that have completed the USB-IF compliance program.

**DISTRACTIONS**

**Driving**

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a phone while driving (even with a hands-free kit) can cause distraction and lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

**Operating Machinery**

Full attention must be given to operating the machinery in order to reduce the risk of an accident.
PRODUCT HANDLING

General Statement on Handling and Use
You alone are responsible for how you use your phone and any consequences of its use.
You must always turn off your phone wherever the use of a phone is prohibited. Use of your phone is subject to safety measures designed to protect users and their environment.
• Always treat your phone and its accessories with care and keep them in a clean place.
• Keep the camera lens clean. An unclean camera lens may interfere with the image quality.
• Clean your phone and its accessories with a soft material such as cleaning cloth for eyeglass lenses. Do not use alcohol or other corrosive substances for cleaning or allow them to get inside.
• Do not expose your phone or its accessories to open flames or lit tobacco products.
• Do not expose your phone or its accessories to liquid, moisture or high humidity.
• Do not drop, throw or try to bend your phone or its accessories.
• Do not use harsh chemicals, cleaning solvents, or aerosols to clean the phone or its accessories.
• Do not paint your phone or its accessories.

Battery Safety
• Using unapproved or incompatible battery, charger or power adapter may damage your device, shorten its lifespan or cause a fire, explosion or other hazards.
• The recommended operating temperatures are 32 °F (0 °C) to 95 °F (35 °C) and the storage temperatures are -4 °F (-20 °C) to 113 °F (45 °C). Extreme temperatures can damage the device and reduce the charging capacity and lifespan of your device and battery.
• Do not place the device or the battery in or near heating equipment, such as microwave ovens, stoves or radiators. Keep the device and the battery away from excessive heat and direct sunlight. If not, the device or the battery may overheat and cause explosion or fire.
• Please disconnect the charger when the battery is fully charged. Overcharging may shorten the battery life.
• Do not short-circuit the battery, as this can cause excessive heat and fire.
• Do not throw the battery into a fire to avoid explosion.
• Do not disassemble, squeeze or puncture the battery, as this can cause explosion or fire.
• When not using the battery for a long period, please charge the battery about half then remove the battery from your device and store it in a cool dry place.
• If the battery damages or shows signs of swelling or leakage, please stop use immediately and contact Consumer Cellular or its authorized service provider for replacement.
• Return the worn-out battery to the provider or put in in the designated recycle place. Do not put it in household waste.
• There is a risk of explosion if the wrong battery model is replaced.

WARNING!
If the battery is broken, you should avoid contact with the contents inside. If they contaminate the skin, immediately rinse with plenty of water and seek medical help when necessary.

Small Children
Do not leave your phone and its accessories within the reach of small children or allow them to play with it. They could hurt themselves or others, or could accidentally damage the phone. Your phone contains small parts with sharp edges that may cause an injury or may become detached and create a choking hazard.

Demagnetization
To avoid the risk of demagnetization, do not allow electronic devices or magnetic media close to your phone for a long time.

Electrostatic Discharge (ESD)
Do not touch the metallic connectors of the nano-SIM card and the microSDHC card.

Antenna
Do not touch the antenna unnecessarily.

Normal Use Position
When placing or receiving a phone call, hold your phone to your ear, with the bottom toward your mouth.

Airbags
Do not place a phone in the area over an airbag or in the airbag deployment area, as an airbag inflates with great force and serious injury could result. Store the phone in a safe and secure area before driving your vehicle.

Seizures/Blackouts
Your phone can produce a bright or flashing light. A small percentage of people may be susceptible to blackouts or seizures (even if they have never had one before) when exposed to flashing lights or light patterns such as when playing games or watching videos. If you have experienced seizures or blackouts or have a family history of such occurrences, please consult a physician. To reduce the risk of blackouts or seizures, use your phone in a well-lit room and take frequent breaks.

Repetitive Strain Injuries
To minimize the risk of Repetitive Strain Injury (RSI) when texting or playing games with your phone:
• Do not grip the phone too tightly.
• Press the buttons lightly.
• Use the special features which are designed to minimize the times of pressing buttons, such as Message Templates and Predictive Text.
• Take frequent breaks to stretch and relax.

Emergency Calls
This phone, like any other wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless phone for emergency communications.

Loud Noise
This phone is capable of producing loud noises, which may damage your hearing. Turn down the volume before using headphones, Bluetooth headsets or other audio devices.

Phone Heating
Your phone may become warm during charging and normal use.

For Your Safety

Connection to Vehicles
Seek professional advice when connecting a phone interface to the vehicle electrical system.

Faulty and Damaged Products
Do not attempt to disassemble the phone or its accessories. Only qualified personnel can service or repair the phone or its accessories. If your phone (or its accessories) has been submerged in water, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorized service center.

Radio Frequency Interference

General Statement on Interference
Care must be taken when using your phone in close proximity to personal medical devices, such as pacemakers and hearing aids. Please consult your doctor and the device manufacturers to determine if the operation of your phone may interfere with the operation of your medical devices.

Pacemakers
Pacemaker manufacturers recommend that a minimum separation of 6 inches (15 cm) be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this, use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.
Hearing Aids
People with hearing aids or other cochlear implants may experience interfering noises when using wireless devices or when one is nearby. The level of interference depends on the type of hearing device and the distance from the interference source. Increasing the separation between them may reduce the interference. You may also consult your hearing aid manufacturer to discuss alternatives.

Medical Equipment
Turn off your wireless device when you are requested to do so in hospitals, clinics or healthcare facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

Aircraft
Turn off your wireless device whenever you are instructed to do so by airport or airline staff.
Consult the airline staff about the use of wireless devices onboard the aircraft and enable airplane mode of your phone when boarding an aircraft.

Interference in Vehicles
Please note that because of possible interference with electronic equipment, some vehicle manufacturers forbid the use of mobile phones in their vehicles unless a hands-free kit with an external antenna is included in the installation.

EXPLOSIVE ENVIRONMENTS

Gas Stations and Explosive Atmospheres
In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your phone or other radio equipment. Areas with potentially explosive atmospheres include fueling areas, below decks on boats, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

Blasting Caps and Areas
Power off your mobile phone or wireless device when in a blasting area or in areas where signs are posted to power off “two-way radios” or “electronic devices” to avoid interfering with blasting operations.
SPECIFICATIONS

Handset specifications are shown in the following table.

<table>
<thead>
<tr>
<th>Specification</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Network capability</td>
<td>4G LTE/GSM/UMTS</td>
</tr>
<tr>
<td>Dimensions</td>
<td>4.37” (H) x 2.17” (W) x 0.76” (D)</td>

NOTE: The phone’s talk time and idle time are based on ideal working environments. The use of extended backlighting and network conditions can reduce battery life and talk/idle time.

SUPPORT

For assistance, please contact:
Chat: ConsumerCellular.com/Contact and click “Chat Now”
Website: ConsumerCellular.com/Help
Telephone: (800) 686-4460

Need to test your cellphone?
You can place a FREE test call by dialing (888) 460-8781 from your cellular phone. If the call is completed correctly you will hear a recorded message telling you that your cellphone is working.

Check your minutes or change your plan.
With Consumer Cellular you are in control and can change your plan at any time. To check your usage and change your plan just go to My Account at ConsumerCellular.com or call (800) 686-4460 any time. The call is free.
WARRANTY

This product is guaranteed for a period of 12 months from the date of purchase. In the unlikely event of a fault occurring during this period, please contact the place of purchase. Proof of purchase is required for any service or support needed during the guarantee period.

This guarantee will not apply to a fault caused by an accident or a similar incident or damage, liquid ingress, negligence, abnormal usage, non-maintenance or any other circumstances on the user’s part. Furthermore, this guarantee will not apply to any fault caused by a thunderstorm or any other voltage fluctuations. As a matter of precaution, we recommend disconnecting the charger during a thunderstorm. Batteries are consumables and are not included in any guarantee.

This guarantee does not apply if batteries other than Consumer Cellular original batteries are used.
