Congratulations on your purchase

The Doro 7050 makes calling, messaging and sending photos or video messages all very easy thanks to widely separated, high contrast keys and a large 2.8 inch screen. It also has an assistance button for added safety. For more information about accessories or other Consumer Cellular products please visit ConsumerCellular.com/Products.

Getting started

When you first receive your phone, you will need to set it up before using it.

Tip: Remember to remove the plastic screen protector.

Unbox your new phone

The first step is to unbox the phone and assess the items and equipment included in the delivery. Make sure to read through the manual so you can familiarize yourself with the equipment and the basic functions.

- The items supplied with the device and any available accessories may vary depending on the region.
- The items supplied are designed only for this device and might not be compatible with other devices.
- Appearances and specifications are subject to change without prior notice.
- You can purchase additional accessories from Consumer Cellular.
- Make sure accessories are compatible with the device before purchase.
- Only use batteries, chargers and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone’s type approval and warranty.
- Availability of all accessories is subject to change depending entirely on manufacturing companies. For more information about available accessories, refer to the Consumer Cellular website.
Insert SIM card, memory card and the battery
The SIM card and the battery are normally pre-installed. Follow these instructions should you ever need to access them yourself. The SIM and memory card holder’s are located inside the battery compartment.

Tip: Take care not to scratch the metallic contacts on the cards when inserting them into the card holders.

Remove the battery cover

IMPORTANT!

Turn off the phone and disconnect the charger before removing the battery cover. Be careful not to damage your fingernails when you remove the battery cover. Do not bend or twist the battery cover excessively as it may get damaged.

Insert the SIM card

IMPORTANT!

Insert the micro-SIM (3FF) card by gently sliding it into the SIM card slot. Make sure that the SIM card’s contacts are facing inwards and that the cut off corner is down, as shown. Take care not to scratch or bend the contacts on the SIM card. Should you need, but have difficulty removing/replacing the SIM card, use adhesive tape on the exposed part of the SIM card to pull it out.

This device accepts a micro-SIM card or 3FF. Use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card.
Insert the memory card (optional):

**IMPORTANT!**

Use only compatible memory cards with this device. Compatible card types include **microSD, microSDHC**. Incompatible cards may damage the card itself, the device and corrupt any data stored on the card.

**Tip:** Take care not to scratch or bend the contacts on the memory or SIM card when inserting them into the card holders.

You may also optionally insert a memory card. Make sure that the memory card’s contacts are facing as shown. To remove the memory card: find the small ridge on the exposed end of the memory card. Put your fingernail into the ridge and gently pull the card out. See *Storage*, p.41 for additional info.

**Insert the battery**

Insert the battery by sliding it into the battery compartment with the contacts facing up to the right. Replace the back cover.

**Charge the phone**

While your phone may come partially charged so that it can be turned on right out of the box, we recommend charging the device fully before using it.
**CAUTION**

Only use batteries, chargers and accessories that have been approved for use with this particular model. Using unapproved accessories may be dangerous and may invalidate the phone's type approval and warranty.

When the battery is running low, ![battery_low_icon] is displayed and a warning signal is heard. When the charger is connected to the phone, ![charger_connected_icon] is displayed briefly, and ![charger_disconnected_icon] when it is disconnected. The battery charge indicator is animated while charging. It takes approximately 3 hours to fully charge the battery. If the phone is turned off when the charger is connected to the phone only the battery charge indicator will be shown on the display. When charging is completed, ![battery_full_icon] is displayed on the screen.

**Use a wall power outlet to charge**

1. Connect the small head of the USB charging cable to the charging socket ![charging_socket_icon] on the phone.
2. Plug the large head of the cable to the USB charger.
3. Plug the power adapter to a wall power outlet.

**Use a charging cradle to charge**

1. Connect the small head of the USB charging cable to the cradle. Place the phone in the cradle.
2. Plug the large head of the cable to the power adapter.
3. Plug the power adapter to a wall power outlet.

**Use a computer or other power source to charge**

1. Connect the small head of the USB charging cable to the phone.
2. Plug the large head of the cable to the computer’s USB port.

**Note!** Generally charging is quicker if plugged directly into the wall.

If the phone is turned off during charging, the phone is still charging. Press ![battery_status_icon] to view charging status.

**Save energy**

When the battery is fully charged, disconnect the charger from the device and unplug the charger from the wall outlet. To save power, the screen turns off after a while. Press any button to wake the screen up. Full battery capacity will not be reached until the battery has been charged 3–4 times. Batteries degrade over time, which means that call time and standby time
will normally decrease with regular use. During extended operation, the device may feel warm. In most cases, this is normal. To avoid getting too warm, the device may switch off charging. If the device is not working properly, please contact Customer Service, see Support, p.55.

**Turn the phone on and off**

1. Press and hold  on the phone to turn it on or off. Press **Select** to **Power off**.

2. If the SIM card is valid but protected with a PIN code (Personal Identification Number), **SIM PIN** is displayed. Enter the PIN code and press **Done**. Delete by pressing **Clear** (upper right corner of keypad).

**Note!** If PIN and PUK codes were not provided with your SIM card, please contact Consumer Cellular.

# tries left shows the number of PIN attempts left. When no more attempts remain, **SIM card is locked**. is displayed. The SIM card must then be unlocked with the PUK code (Personal Unblocking Key).

1. Press **Enter PUK** to:
   - Enter PUK code.
   - Create PIN (must contain 4 to 8 digits).
   - Confirm new PIN.
2. Confirm with **Done**.

### Getting to know your phone

**External display**

The external display shows the time, a number of status indicators, and notifications for incoming calls. The external display can only display characters in black and white. If the external display times out, press and hold any of the side keys +/− to turn it back on.

**Phone indicators**

There are lights on the phone lid that indicate the following:

- The green light appears when you have a new message or a missed call.
- The red light appears when the battery is running low and during charging.
Notification panel and status bar
At the top of the main screen to the left you can see if there are any notifications. The number will show how many notifications you have.

- To view the notifications, press the left selection button !.
- Press Dismiss to close each notification.

Note! You do not delete the item itself, just the notification.

At the top of the main screen to the right you can see the status symbols, such as network signal strength, battery level, Bluetooth activity and more.

Descriptions in this document
Descriptions in this document are based on your phone’s setup at the time of purchase. Instructions normally start from the start screen. Press to reach the start screen. Some descriptions are simplified.

The arrow (→) indicates next action in step-by-step instructions.

Basic phone operations

Call ☎:
- Dial a number or answer incoming call.
- Enter the call log.

End call/Power on and off ☻:
- End calls or return to the start screen.
- Long press to power on or off.

Assistance 📞:
Press to make an assistance call.

Back ↩:
Return to the previous screen.

Camera 📷:
Press to initiate the camera app.
Selection buttons (選): The selection buttons have multiple functions. The current function is shown above the selection button on the screen. During a call the selection buttons give access to additional functions.

Navigation keys (方向鍵):
- (A) Use the Four-way navigation keys to navigate up, down, left and right.
- (B) Use the OK to open the Menu and to confirm actions.

Standby (idle mode)
When the phone is ready to use, and you have not keyed in any characters, the phone is in standby.
- Press to return to standby mode.
- Press left selection button (準備) to access the notifications, the right selection button (保存) to access your saved contacts and OK to open the Menu.

Tip: You can always press to return to standby.

Quick settings
From the standby screen, press (上) to reach some useful functions such as Flashlight, Bluetooth or Vibrate.

Note! The flashlight drains the battery very quickly. Remember to turn off the flashlight after you are done using it.

Volume keys + / −
- During a call the volume keys adjusts the call volume.

⚠️ CAUTION
Press Options to Enable boost volume or Disable boost volume. Enable boost volume can be very loud, so please use the feature with caution.
• From standby you can set your device to vibrate mode: press and hold # until the device vibrates and ⚠️ appears.

See also Volume, p.28 for more information.

Note! If you use a hearing aid or have hearing difficulties when using the telephone in a noisy environment, you can adjust the phone's audio settings, see Audio setup, p.28.

Vibrate
Vibrate is a fixed profile with Keypad tone, Message tone and Ringtones disabled, while calendar events and Alarm are unchanged.

• Press and hold the shortcut button # to activate or deactivate vibrate mode.

Headset
When a headset is connected, the internal microphone in the phone is automatically disconnected. If available, use the answer key on the headset to answer and end calls.

⚠️ CAUTION

Using a headset at high volume may damage your hearing. Adjust the volume level carefully when using a headset.

Enter text

Enter text manually

Select character

• Press a numerical key repeatedly until the desired character is shown. Wait a few seconds before entering the next character. Press Clear to erase characters.

Special characters

1. Press * for a list of special characters.
2. Select the desired character using the Four-way navigation keys and press Select to enter it.

Move the cursor within text

• Use the Four-way navigation keys to move the cursor within the text
Upper case, lower case, numerals and predictive text
- Press # to choose between upper case, lower case, numerals and predictive text. See Input mode, p.9.

Change writing language
- Press and hold # to change language. See Writing language, p.31.

Enter text with predictive text
In some languages you can use predictive text input method which uses a dictionary to suggest words.
- Press each key once, even if the displayed character is not the one you want. The dictionary will suggest words based on the keys you have pressed.

Example
1. Press 3, 7, 3, 3 to write the word “Fred”. Complete the word before looking at the suggestions.
2. Use the Four-way navigation keys to move the cursor to view the suggested words.
3. Press OK and continue with the next word. Alternatively, press 0 to continue with the next word.
4. If none of the suggested words are correct, use manual input mode.

Note! See Writing language, p.31 and Input methods, p.32 for more information.

Input mode
- Press # to change input mode. The icon on the top left of the display indicates the input mode.

Predictive text
Sentence case
UPPER CASE
lower case
Numerals

Calls

Make a call
1. Enter the phone number including the area code. Delete with Clear.
2. Press to make a call.
3. Press to end the call.

Tip: For international calls, always use + before the country code for best results. Press * twice for the international prefix +.

Call from the phonebook
1. Press Contacts to open the phonebook.
2. Use / to scroll through the phonebook, or to do a quick search by pressing the key corresponding to the first letter of the entry.
3. Press Options Call to dial the selected entry. If needed, select the number.
   Alternatively, press to dial.
4. Press to cancel the call.

Receive a call
1. Open the phone to answer.
   Tip: Press and hold +/- to temporarily switch off the ringer without opening the phone.
   To reject an incoming call by opening the phone, see Answer mode, p.37.
   Press / close the phone to reject a call.
2. Press to end the call.

Call information
During a call, the outgoing or incoming phone number and the elapsed call time is displayed. If the identity of the caller is withheld, Unknown is displayed.

Call options
During a call the selection buttons1 ( ) give access to additional functions.

---

1. Selection buttons have multiple functions. The current function is shown above the selection button on the display.
Mute
Press **Mute** to disable the microphone. Press **Unmute** to re-enable the microphone.

Options
- **Enable boost volume / Disable boost volume.** Enable boost volume can be very loud, so be careful when using this feature.
- **Enable speaker** to activate loudspeaker mode. Speak clearly into the phone microphone at a maximum distance of 3 feet. Press **Disable speaker** to return to normal mode.

  *Note!* Loud background noises (music, etc.) may interfere with the sound quality.

- **Add call** to call another number. When the second party is connected you can **Swap call** and **Merge call**.
- **Hold call/Unhold call** to hold/retrieve the current call.

  *Note!* For settings related to calling, see *Call settings*, p.37

Emergency calls
As long as the phone is switched on, it is possible to place an emergency call by entering the main local emergency number for your present location followed by 

Some networks accept calls to emergency numbers without a valid SIM card. Contact Consumer Cellular for more information.

Call log
Received, missed and dialed calls are saved in a combined call log. For multiple calls related to the same number, only the most recent call is saved.

1. Press 

   Alternatively, press **Menu → Call log**.

2. Calls are displayed as follows depending on call type:

   - **Incoming call**
   - **Outgoing call**
   - **Missed call**

3. Select a call and press **to dial, or Options:**
Call information to show details for the selected call.
Send message to send a text message.
Create new contact to save the number for a new contact.
Add to existing contact to add the number for an existing contact saved to the phone.
Delete call log to delete entries in the call log.
Press Select for each entry you want to delete and confirm with Delete.

TTY mode
TTY Mode, also known as Text Telephone, TDD or Teletypewriter for the Deaf, is designed to help people who are deaf, hard-of-hearing or speech impaired, or who have speech or language disabilities, communicate over a phone call. Your phone is compatible with TTY devices. Please check with the manufacturer of the TTY device to ensure that it supports digital wireless transmission. Your phone and the TTY device will connect using a special cable that plugs into your phone’s headset jack. If this cable was not provided with your TTY device, contact your TTY device manufacturer to purchase the connector cable.

Activate TTY
1. Press Menu ➔ Settings ➔ Calls ➔ TTY.
2. Select your needed option:
   • Off to disable all TTY settings.
   • Full to enable all TTY settings.
   • VCO (Voice Carry Over) to not hear but to talk.
   • HCO (Hearing Carry Over) to hear but not to talk.

Start a call over TTY
When a phone uses TTY Mode, it behaves similarly to how it does when sending and receiving text messages, except it uses an actual phone call connection to transfer data.

1. Enter the phone number including the area code and press .
2. Once the phone has established the connection with the other line, the TTY devices can begin communicating with each other.

Note! Both devices used in the phone call need to support TTY for the service to work.
Add contact
1. Press Menu ➔ Contacts ➔ New.
2. Enter First name, Last name and Mobile phone for the contact. Delete with Clear.
3. Press Options for more options.
4. Press Save.

Tip: For international calls, always use + before the country code for best results. Press * twice for the international prefix +.

Manage phonebook contacts
1. Press Menu ➔ Contacts.
2. Select a contact with Select, then press Options:
   • Add as Favorite (Top 10) to set the entry as one of the first 10 contacts listed in the phonebook. See Top 10, p.14.
   • Edit to edit the contact. When done, press Save.
   • Share to send the selected contact as a vCard via selected method.
   • Delete to delete the selected contact. Press Delete again to confirm.
3. Press when done.
4. Select a contact, but don’t press Select
5. Press Options:
   • Edit to edit the contact. Same as above.
   • Call to call the contact.
   • Send message to create a message. See Create and send text message (SMS)/picture message (MMS), p.18.
   • Share to send a contact. Same as above.
   • Delete contacts to select one or multiple contacts to delete. Press Delete to confirm.
   • Move contacts ➔ Move from:
     • Phone memory ➔ To SIM memory to select and move one or multiple contacts from the phone memory to the SIM card. Press Move to move.
• SIM memory To Phone memory to select and move one or multiple contacts from the SIM card to the phone memory. Press Move to move.

• Copy contacts → Copy from:
  • Phone memory → To SIM memory to select and copy one or multiple contacts from the phone memory to the SIM card. Press Copy to copy.
  • SIM memory → To Phone memory to select and copy one or multiple contacts from the SIM card to the phone memory. Press Copy to copy.

• Settings. See Phonebook settings, p.14.

Phonebook settings

Owner number
Your phone number may be stored as Owner number in the phonebook.

Add numbers
1. Press Menu → Contacts → Settings → Owner number:
2. Press Add to name and number and
3. When done, press Save.

Top 10
Set an entry as one of the first 10 contacts listed in the phonebook.
2. Select one of the empty entries and press Add.
3. Use ✓/✓ to scroll through the phonebook, or quickly search by pressing the key corresponding to the first letter of the entry.
4. Press Select to select an entry.
To edit or delete an existing entry, select Options → Edit or Remove favorite (Top 10).

Tip: You can also add an entry from the phonebook to your Favorites list. Select the contact and press Options → Add as Favorite (Top 10).

Sort contacts
Set in what order you sort your contacts
1. Press Menu → Contacts → Settings → Sort contacts:
2. Select **Sort by first name** or **Sort by last name**.
3. Confirm with **Select**.

**Service number**
A service number is a useful number that Consumer Cellular may have included in your SIM card.

Press ☰ Menu ➔ Contacts ➔ Settings ➔ Service number.

**Speed dial/Voicemail**
Use 0 and 2–9 to speed dial a contact from standby.
- Press and hold the corresponding key to speed dial.

**Set speed dial contacts**
1. Press ☰ Menu ➔ Contacts ➔ Settings ➔ Set speed dial contacts.
2. Select 0 ➔ Add and select an entry from the phonebook.
3. Press **Select** to select number.
4. Repeat to add speed dial entries for buttons 2–9.

**Tip:** To replace or delete an existing entry, select it and press Options ➔ Replace or Remove from speed dial.

**Voicemail**
Voicemail is included with your Consumer Cellular plan. For more information, contact customer service.

To check your voicemail, press and hold the 1 key.

**Import contacts**
1. Press ☰ Menu ➔ Contacts ➔ Settings ➔ Import contacts:
2. Select an option from the list and **Select** to confirm.

**Export contacts**
1. Press ☰ Menu ➔ Contacts ➔ Settings ➔ Export contacts:
2. Select an option from the list and **Select** to confirm.
Memory
You can save names and phone numbers in the phone’s memory (internal phone book) and in the SIM card’s memory (SIM phone book). Select where you will save new contacts you create.

1. Press Menu ➔ Contacts ➔ Settings ➔ Memory:
   • **Phone** to save contacts with multiple phone numbers, as well as picture, address and more.
   • **SIM** to 1 phone number per contact.
2. Press OK to confirm.

**Note!** Number and length of the phone numbers/contacts that can be stored may vary.

ICE (In Case of Emergency)
First responders can access additional information such as medical information from the victim's phone in case of emergency. In the event of a trauma, it is critical to have access to this information as early as possible. All fields are optional, but the more information provided, the better.

1. Press Menu ➔ Contacts ➔ ICE Contacts ➔ Select.
2. Use ✔/☒ to scroll the list of entries.
3. Press Edit to add or edit information in each entry.

**ID**

- **Name:** enter your name.
- **Birth:** enter your date of birth.
- **Height:** enter your height.
- **Weight:** enter your weight.
- **Address:** enter your home address.
- **Language:** enter your preferred language.
- **Insurance:** enter your insurance provider and policy number.
- **Contacts**
  - **Contact 1:, Contact 2:** and **Doctor:**
    - Press Add or Delete a contact from the phonebook. If possible, add your relationship to your ICE contacts in the phonebook, such as “ICE Wife Mary Smith”.

**Important info**
• **Condition:** enter any medical conditions or medical devices (e.g. diabetic, pacemaker).
• **Allergies:** enter any known allergies (e.g. penicillin, bee stings).
• **Blood type:** enter your blood type.
• **Vaccination:** enter any relevant vaccination.
• **Medication:** enter any medication that you are treated with.
• **Other info:** enter other information (e.g. organ donor, living will, consent to treat).

4. When done, press **Save**.

---

### Assistance button

#### CAUTION

When an emergency call is activated the phone is pre-set to hands-free mode. Do not hold the device near your ear when the hands-free mode is in use, because the volume may be extremely loud.

The Emergency button allows you easy access to contact a predetermined number should you need help. The number will normally be a family member or a friend. To use the Emergency button, you must first activate the function and store the emergency number you wish to call.

#### Make an assistance call

1. **When help is needed,** press the assistance button 3 times within 1 second.
   
   The assistance call begins after a delay of 5 seconds. In this time you can prevent a possible false alarm by pressing 📷.

**Note!** Some private security companies can accept automatic calls from their clients. Always contact the security company before using their phone number.

#### Activation

Activate the assistance function using the assistance button.

1. Press 📡**Menu ➔ Settings ➔ Assistance ➔ Activation:**
   - **On (3)** to press the button 3 times within 1 second.
   - **Off** to disable the assistance button.
2. Press **Select** to confirm.
Number
The number that is called when assistance button is pressed.

**IMPORTANT!**
Always let your friend or family member know that they are listed as your emergency contact.

1. Press 🌐 Menu ➔ Settings ➔ Assistance ➔ Number.
2. Select Empty ➔ Add ➔ Manual to add names/numbers manually. Alternatively, press Contacts to add a contact from the phonebook.
3. Press OK to confirm.

**Tip:** To edit or remove an existing entry, select it and press Opt. ➔ Edit/Delete.

Messages

Create and send text message (SMS)/picture message (MMS)
A text message (SMS) is a short text message that can be sent to other mobile phones. A picture message can contain text and media objects such as pictures, sound recordings and video. The settings for messaging are supplied by Consumer Cellular and can be sent to you automatically via text message.

1. Press 🌐 Menu ➔ Messages ➔ New.
2. Select a recipient from Contacts. Alternatively, enter number to add recipient manually.
3. Go to the message field and write your message, see Enter text, p.8.
4. Press Options:
   • Add attachment to select an attachment from:
   • Camera to use the camera to take a picture or record a video.
Note! If you add more than one picture, the following pictures are increasingly compressed by the phone (scaled down). This to allow you to send more pictures in one message. To keep best picture quality, send only one picture per message.

- **Music** to add music from your library.
- **Video** to add video from your library.
- **Gallery** to add a picture from your library.
- **Contacts** to add a contact from your phonebook.

  - **Save as draft** to save a message that you would like to send later.
  - **Cancel** to discard the message.

5. When done, press **Send**.

Note! If you choose to add multiple recipients, you will be charged for each recipient (maximum 10). For international calls, always use + before the country code for best results. Press **#** twice for the international prefix +.

### Read and respond to messages

Messages are grouped into message threads by contact. A thread can contain both text and multimedia messages.

1. Press **Menu ➔ Messages**.
2. Select a thread and press **Options**:
   - **Delete thread** to delete the thread.
   - or **Select thread** to select thread(s) to delete.
3. Select a thread/contact and press **Select**.
4. Go to the message field and write your reply message and press **Send** when ready.
5. Press **Options** for the same options as above and:
   - **Select messages** to select individual message(s) to delete.
   - **Call** to call the contact.
   - **Delete thread** to delete the thread.
6. Select an individual message and press **Select ➔ Options** for the same options as above and:
   - **Forward** to forward the message. Edit the message (if desired), then press **Send**.
   - **Delete** to delete that individual message.
Wireless Emergency Alerts

Wireless Emergency Alerts (WEA) are geographically-targeted messages. Alert messages are provided by the US Department of Homeland Security and will alert you of imminent threats to your safety within your area. There is no charge for receiving an Emergency Alert message.

**IMPORTANT!**
WEA messages include a special, repeated tone and vibration. Listen to them to be able to identify them if and when received.

You may opt out of AMBER alert, Extreme alert and Severe alert. Presidential alert cannot be disabled.

2. Press Alert inbox ➔ Select.
   • Select an Alert message to view the detailed content.
3. Check/uncheck the alerts to receive:
   • **Presidential alert** Alerts issued by the President (cannot be unchecked).
   • **Extreme alert** Imminent extreme threats to safety of life and property.
   • **Severe alert** Imminent severe threats to safety of life and property.
   • **AMBER alert** Missing child alert.
4. Select to receive alerts in Spanish. Alerts in English can not be disabled.
5. Select to listen to WEA Ringtone.

**Message settings**

**Reminder**
The reminder alerts you if you haven’t checked your messages within 10 minutes from receipt.

1. Press Menu ➔ Messages ➔ Settings ➔ Reminder.
2. Select On to enable, or Off to disable.
3. Press **Select** to confirm.

**Cell broadcast**

You can receive messages on various topics from Consumer Cellular, such as weather or traffic conditions in a particular region. For available channels and relevant channel settings, contact Consumer Cellular. Cell broadcast messages cannot be received when the device is roaming.

1. Press Menu ➔ Messages ➔ Settings ➔ Cell broadcast:
   - **Activation** select Off or On to enable/disable.
   - **Read messages** to read the messages.
   - **Channel settings** to select from which channels to receive/subscribe messages. Press Options for the options Subscribe, Cancel subscription, Add, Edit and Delete to define your channels.

2. Press **Yes** to confirm and save.

**WAP push**

A WAP Push service is basically a specially encoded message which includes a link to a WAP address. On receiving a WAP Push, a WAP-enabled handset will automatically give the user the option to access the WAP content. When enabled, it directly opens the browser to display the WAP content, without user interaction.

1. Press Menu ➔ Messages ➔ Settings ➔ WAP push:
   - **On** to enable the service.
   - **Off** to disable the service.

2. Press **Select** to confirm.

**SMS Center**

Text messages requires a message center number, this is normally automatically set on your phone. The number can be obtained from the mobile carrier.

1. Press Menu ➔ Messages ➔ Settings ➔ SMS Center.
2. Enter the service center number.
3. Press **Save** to confirm.
You can take photos, record videos and view your photos and videos using the 📷 Camera menu.

To get sharp photos and videos, wipe the lens clean with a dry cloth.

2. Use ‹ › to switch between Photo and Video Mode. Use ↑/↓ to zoom in and out.
3. Press 📷 or the OK to take photo or start/stop video recording.
4. Press Flash (photo mode)/Lamp (video mode):
   - Auto (only available in photo mode)
   - On
   - Off
5. Press Preview to view the the photo/video.
   - Press Zoom to Zoom in/Zoom out in the photo.
   - Press Options for more options, see Gallery, p.23.
6. The photo/video is automatically saved if you don’t decide to delete it.

Note! Zoom may reduce picture quality.

View and manage your saved videos.

1. Press ☰ Menu ➔ Media ➔ Video.
2. Press Camera to record a video, see Camera, p.22.
3. Select a video and press Options:
   - Share to share a video via:
     - Messages to send as picture message. See Create and send text message (SMS)/picture message (MMS), p.18.
     - Bluetooth to send to a Bluetooth device, see Bluetooth®, p.35.
     - File info to view detailed information about the file, e.g. date, size, type.
   - Delete to delete. Press Yes to confirm or No to return.
Select multiple to select one or multiple videos. Press Options for different options.

Recorder
Use the sound recorder to record notes and messages.
1. Press Menu ➔ Media ➔ Recorder.
2. Press New to create a new recording.
3. Press OK to start and pause recording. Press Done when done.
4. Enter a name for the recording or use the pre-assigned name and press Save to save the recording. Press Discard to discard the recording.
5. Select a recording and press OK to play and pause the recording.
6. Press Options:
   • Delete to delete the recording.
   • Rename to rename. Type the name and press Save or Cancel to return.
   • Save to music library to save the recording to the music library. From the music library it’s possible to share the recording.
   • Settings to set the recording quality.

Gallery
View and manage your saved pictures.
1. Press Menu ➔ Media ➔ Gallery.
2. Press Camera to take a photo or record a video, see Camera, p.22.
3. Select a picture and press Zoom to Zoom in/Zoom out in the photo.
4. Select a picture and press Options:
   • Delete to delete. Press Yes to confirm or No to return.
   • Rename to rename. Type the name and press Save or Cancel to return.
   • Share to share a video via:
     • Messages to send as picture message. See Create and send text message (SMS)/picture message (MMS), p.18.
     • Bluetooth to send to a Bluetooth device, see Bluetooth®, p.35.
• **File info** to view detailed information about the file, e.g. date, size, type.

• **Lock/Unlock** to lock/unlock the photo. When locked the photo cannot be deleted from the Gallery, but it’s still possible to delete from the File Manager.

• **Select multiple** to select one or multiple photos. Press **Options** for different options.

• **Set as** to use a photo as **Wallpaper** or **Image for existing contact**.

---

**Organizer**

**Alarm**

You can save up to 5 different alarms.

**Note!** The alarm will not work if the phone is turned off.

1. Press **Menu → Organizer → Alarm**.
2. Press **New** for a new alarm.
3. Select and set the different options:
   • **Time**.
   • **Repeat**: to scroll through the list of days and press **Select** to enable/disable the alarm for each day. Have all days unchecked for a single occurrence.
   • **Sound** to select the sound to be played.
   • **Alarm name** to set a name for the alarm.
4. Press **Save** to confirm.

**Snooze or turn off**

• When the alarm goes off a signal will sound. Press **Stop** to turn off the alarm or press **Snooze** to repeat the alarm after 10 minutes.

**Tip:** Select an alarm and press **On** to enable or **Off** to disable the alarm.

To edit or delete an alarm, select the alarm and press **Options → Edit** to change or **Delete** to delete the alarm.

**Calendar**

**Note!** Calendar reminders will not work if the phone is turned off.
Add event
1. Press Menu ➔ Organizer ➔ Calendar.
2. Select a date and press Add, then enter your required information:
   • Title to enter a title.
   • Location to enter a location.
   • Check All-day Event if it’s an all-day event.
   • Start date to set the start date.
   • End date to set the end date.
   • Start time to set the start time.
   • End time to set the end date.
   • Calendar to set the calendar to save the event in.
   • Event reminder to set when a reminder should go off before an event occurs.
   • Notes to enter free text for the event.
3. When done, press Save.

Options
Press Menu ➔ Organizer ➔ Calendar ➔ Options:
• Select different views to show the calendar.
• Go to Date to directly go to a date.
• Search to search for an event.
• Settings for the calendar settings

Calculator
The Calculator can perform basic mathematical operations.
1. Press Menu ➔ Calculator.
2. Enter the first number. Use ‡ to enter decimal points and † for ±.
3. Use the navigation key to select an operation (+, −, x, ÷).
4. Enter the next number.
5. Repeat steps 2–4 as necessary. Press OK (=) to calculate the result.

Note
1. Press Menu ➔ Organizer ➔ Note.
3. Enter your note using the keypad, see *Enter text*, p.8.
4. Press **Save** to save.

**Tip:** For more options select an existing note, and press **Note**.

**File manager**
Manage the contents and properties of files. You can open, delete, move, copy and rename files.

1. Press **Menu ➔ Settings ➔ File manager**.
2. Select **Internal** or **SD Card ➔ Open**.
3. Select a folder, e.g. **photos** and press **Open**.
4. Select a file and press **Open** if it’s a supported file. Otherwise press **options** to see the available options.

---

**FM Radio**

The 🎧 **FM radio** has a frequency range from 87.5 to 108.0 MHz. To listen to the radio you need to connect a compatible headset that works as antenna.

**Turning the radio on/off**

1. Connect a headset to the headset socket 🎧.
2. Press **Menu ➔ FM Radio ➔ On**. The radio is on. The tuned frequency is displayed. Press **Off** to switch it off.

**Tip:** Press 🥂 to return to standby mode. The radio will continue to play. Disconnecting the headset will turn off the radio.

**Volume**

1. Press **Menu ➔ FM Radio ➔ Options ➔ Volume**.
2. Use 🅱️/.getenv to adjust the volume.

**Scan stations**

1. Press **Menu ➔ FM Radio ➔ Options**.
2. Select **Scan stations** to automatically search for available radio stations.
3. Select the station you want to listen to.
Add to favorites
2. Select a station and press Options → Add to favorites.
3. Press Favorites to see your favorites. Press Stations to see your scanned radio stations.

Loud speaker
1. Press Menu → FM Radio → Options → Switch to speaker.
2. Use volume keys to adjust the sound volume.
3. To turn off the speaker, press Options → Switch to headphones.

Connect the phone to a computer
You can connect the phone to a computer in order to transfer pictures, music and other types of files. All you have to do is connect a USB cable between the phone and computer. From your computer's file explorer, you can drag and drop content between your phone and the computer.

Note! You might not be able to transfer some copyright protected material. See Storage, p.41

Drag and drop content between phone and a computer
1. Connect your phone to a computer using a USB cable.
2. Wait until the phone or memory card appears as an external drive in the file explorer.
3. Drag and drop selected files between the phone and the computer.

Note! You can transfer files using a USB cable on most devices and operating systems supporting a USB Mass Storage interface.

Disconnect the USB cable safely
1. Make sure to enable the hardware to be safely removed.
2. Disconnect the USB cable.

Note! Computer instructions may vary depending on your operating system. See the documentation of your computer's operating system for more information.
Personalization

Sound

Audio setup
If you use a hearing aid or have hearing difficulties when using the device in a noisy environment, you can adjust the audio settings.

1. Press Menu ➔ Settings ➔ Personalization ➔ Sound ➔ Audio setup:
   • Normal for normal hearing in normal conditions.
   • High for moderate hearing impairment or use in a very noisy environment.
   • HAC for use with hearing aid.
2. Press Select to confirm.

Note! Try different settings to find the one that suits your hearing the best.

Volume
Adjust the volume settings for various sounds on your device.

1. Press Menu ➔ Settings ➔ Personalization ➔ Sound ➔ Volume:
2. Select type of sound and use ←/→ to adjust the volume.
   • Media.
   • Tones.
   • Alarm.
3. Press ⊞ when done.

Tones
Adjust settings for various tones and alerts on your device.

Vibrate
Select to vibrate for incoming calls.

1. Press Menu ➔ Settings ➔ Personalization ➔ Sound ➔ Tones ➔ Vibrate.
2. Select On to enable, or Off to disable.
3. Press Select to confirm.
Ringtones
Select a ringtone with the best tone curve adjustments and frequencies to best fit your needs.

1. Press Menu ➔ Settings ➔ Personalization ➔ Sound ➔ Tones ➔ Ringtones.
2. Use ✓/✓ to select one of the available melodies, the melody will be played.
3. Press Select to confirm.

Tip: Set up the Message tone, Keypad tone, Power on and Power off in the same way. Please also note that Keypad tone can be set as Talking keys giving voice confirmation on key presses.

Other sounds
You can select to enable/disable sounds for the camera.

1. Press Menu ➔ Settings ➔ Personalization ➔ Sound ➔ Other sounds ➔ Camera sound:
2. Select On to enable, or Off to disable.
3. Press Select to confirm.

Display
Wallpaper
1. Press Menu ➔ Settings ➔ Personalization ➔ Display ➔ Wallpaper.
2. Select wallpaper from:
   • Camera to take a photo.
   • Wallpaper for predefined available wallpapers.
   • Gallery for images available in your gallery.

Text size
You can adjust the text size for the menu and messages.

1. Press Menu ➔ Settings ➔ Personalization ➔ Display ➔ Text size Normal or Large.
2. Press OK to confirm.

Brightness
You can adjust the brightness of the display.

1. Press Menu ➔ Settings ➔ Personalization ➔ Display.
2. Select **Brightness ➔ Level 1, Level 2 or Level 3**.
3. Press **OK** to confirm.

**LCD backlight**
Select the delay time for the display backlight.

1. Press **Menu ➔ Settings ➔ Personalization ➔ Display**.
2. Select **LCD backlight ➔ 30 seconds, 1 min or Never**.
3. Press **Select** to confirm.

**Idle display**
In standby mode the display can show clock only, clock and Consumer Cellular, or all information.

1. Press **Menu ➔ Settings ➔ Personalization ➔ Display**.
2. Select **Idle display ➔ Clock only, Clock & operator or All info**.
3. Press **Select** to confirm.

**External display**
Select how and when the external display should be turned on.

**Note!** If the external display always is turned on, it drains the battery more.

1. Press **Menu ➔ Settings ➔ Personalization ➔ Display ➔ External display**.
2. Select **Notifications** to set how notifications should be displayed on the external display:
   - **Until read** to display a notification until it’s read.
     **Note!** This setting drains the battery quicker.
   - **Short time** to display a notification for a short time (30 s.).
3. Select **Clock** to set how the clock should be displayed on the external display:
   - **Always on** to always display the clock.
     **Note!** This setting drains the battery quicker.
   - **Press volume**: longpress any of the volume buttons to briefly display the clock.
4. Press **Select** to confirm.
Themes
You can select different themes to adjust the phone’s texts and background.

1. Press Menu ➔ Settings ➔ Personalization ➔ Display ➔ Themes.
2. Use ▼/▲ to select a theme.
3. Press OK to confirm.

Date & time

Tip: The phone is set to automatically update time and date according to current time zone. To turn off, select Date & time ➔ Auto time ➔ Off. Automatic update of date and time does not change the time you have set for the alarm clock or the calendar. They are in local time. Updating may cause some alarms you have set to expire depending on network support and subscription.

Set the time and date

1. Press Menu ➔ Settings ➔ Personalization ➔ Date & time:
   • Auto time, change to Off to manually set the date and time.
   • Date to enter the date.
   • Time to enter the time.
   • Time zone to select your current time zone.
   • Time format to select 12-hour or 24-hour time format.
   • Date format and select the desired date format.
2. Press when done.

Language

The default language for the phone menus, messages, etc. is determined by the SIM card. You can change this to any other language supported by the phone.

1. Press Menu ➔ Settings ➔ Personalization ➔ Language.
2. Select a language.
3. Press when done.

Writing language

1. Press Menu ➔ Settings ➔ Personalization ➔ Language ➔ Writing language.
2. Select writing languages.
3. Press ↺ when done.

**Input methods**
Select the default input method.
1. Press Menu ➔ Settings ➔ Personalization ➔ Language ➔ Input methods.
2. Select the default input method between sentence case, lower case, upper case, numerals or predictive text.
3. Press Select when done.

**Block function**
1. Press Menu ➔ Settings ➔ Personalization ➔ Block function.
2. Unselect each function you want to disable.
3. Press Done to confirm.

**Flashlight**
1. From idle screen, press ↗ ➔ Flashlight ➔ Select to turn it on.
2. Press Select again to turn off.

**Set automatic switch off time**
1. Press Menu ➔ Settings ➔ Personalization ➔ Flashlight ➔ OK.
2. Select after what time the light should automatically be turned off, then press Select.

*Note!* The flashlight will drain the battery very quickly. Remember to turn off the flashlight after use.

**Network & connectivity**

**Network setup**
Select network
1. Press Menu ➔ Settings ➔ Network & connectivity ➔ Network setup ➔ Select network:
   • New search to perform new search if connection is lost.
• **Select network** to view available network, a list of available network operators is displayed (after a short delay). Select desired operator.

• **Network mode** to set selection of another network. Select **Automatic** to select network automatically or **Manual** to select network manually.

**Network information**
View your current network settings.

**Data connection**

<table>
<thead>
<tr>
<th>IMPORTANT!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Using mobile data services can be costly. We recommend that you check your data rates with Consumer Cellular.</td>
</tr>
</tbody>
</table>

Enable/disable mobile data for services like software update. Select **Off** to avoid data charges.

1. Press **Menu ➔ Settings ➔ Network & connectivity ➔ Network setup ➔ Data connection**.
2. Select **On** to enable, or **Off** to disable.
3. Press **Select** to confirm.

**Data roaming**
Your phone automatically selects your home network (Consumer Cellular) if within range. If not within range, you can use another network, provided your network operator has an agreement that allows you to do so. This is called roaming. Contact Consumer Cellular for more information.

1. Press **Menu ➔ Settings ➔ Network & connectivity ➔ Network setup ➔ Data roaming**.
2. Select **On** to enable, or **Off** to disable.
3. Press **OK** to confirm.

<table>
<thead>
<tr>
<th>IMPORTANT!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Using data services while roaming can be costly. Contact Consumer Cellular for data roaming rates before you use data roaming.</td>
</tr>
</tbody>
</table>

**APN Settings**
An Access Point Name (APN) is the name of a gateway between a mobile network and another computer network. The APN settings are used by
services that communicate using other computer networks. The APN settings are usually already included from the start.

Follow the steps below if you need to change any setting. Contact Consumer Cellular for correct settings.

2. Select a profile and the service provider.
3. Press Opt. ➔ Add/Edit to enter settings for Consumer Cellular:
   - APN to enter the APN address.
   - Identifier (User name) to enter user name.
   - Password to enter password.
   - HTTP proxy host to enter HTTP proxy address.
   - HTTP proxy port to enter HTTP proxy port.
   - MMS proxy to enter MMS proxy address.
   - MMS port to enter MMS proxy port.
   - MMSC to enter the MMSC.
   - Authentication to select the type of authentication to be used.
   - APN Type to enter the APN type.
   - Protocol to select the type of protocol to be used.
   - Roaming protocol to select the type of protocol to be used when roaming.
4. Press Save to save or Cancel to return.
5. Select your new/modified profile and press Activate.

You can also delete a profile by selecting one and press Opt. ➔ Delete.

VoLTE
Set if voice calling over LTE network should be enabled or disabled.

1. Press Menu ➔ Settings ➔ Network & connectivity ➔ Network setup ➔ VoLTE.
2. Select On to enable, or Off to disable.
3. Press Select to confirm.
Bluetooth®

**IMPORTANT!**
If you are not using Bluetooth connectivity, switch it off to save power. Do not pair with an unknown device.

**Activate Bluetooth**
2. Select On to enable, or Off to disable.

**Bluetooth settings**

**Visible to All**
1. Press Menu ➔ Settings ➔ Network & connectivity ➔ Bluetooth ➔ Visible to All.
2. Select On to make your device visible to other devices, or Off to be invisible.
3. Press Select to confirm.

**Note!** To prevent other devices from finding your device, select Off. Even if you select Off, paired devices can still detect your device.

**My Phone's Name**
1. Press Menu ➔ Settings ➔ Network & connectivity ➔ Bluetooth ➔ My Phone's Name.
2. Doro 7050 is displayed.
3. If you want to change the name, select Rename my phone and enter the new name.
4. Press Save to save and your new name should appear for other Bluetooth devices.

**Nearby devices**
Search for available Bluetooth devices in your proximity.

2. Select a device from the list and press Select to connect. When connecting to another Bluetooth device you may need to enter a password or confirm a shared key.

**Paired devices**
Add new devices or view saved.
2. Select a device from the list and press Options:
   • Connect/Disconnect to connect/disconnect with the selected device. This may require a profile, usually a headset.
   • Delete to delete the device from the list.
   • Delete all to delete all devices from the list.
   • Security to select an option.

Audio path
1. Press Menu ➔ Settings ➔ Network & connectivity ➔ Bluetooth ➔ Audio path:
   • Phone to answer incoming calls with the phone.
   • Forward BT to forward incoming calls to the Bluetooth device.
2. Press Select to confirm.

Security
1. Press Menu ➔ Settings ➔ Network & connectivity ➔ Bluetooth ➔ Security:
   • Normal (All paired devices are allowed full access automatically.)
   • High (Confirmation may be needed for full access for paired devices.)
   • Information
2. Press OK to confirm.

Wireless Emergency Alerts
Wireless Emergency Alerts are also described in Wireless Emergency Alerts, p.20.

Wireless Emergency Alerts (WEA) are geographically-targeted messages. Alert messages are provided by the US Department of Homeland Security and will alert you of imminent threats to your safety within your area. There is no charge for receiving an Emergency Alert message.

IMPORTANT!

WEA messages include a special, repeated tone and vibration. Listen to them to be able to identify them if and when received.
You may opt out of AMBER alert, Extreme alert and Severe alert. Presidential alert cannot be disabled.

2. Press Alert inbox ➔ Select.
   • Select an Alert message to view the detailed content.
3. Check/uncheck the alerts to receive:
   • Presidential alert Alerts issued by the President (cannot be unchecked).
   • Extreme alert Imminent extreme threats to safety of life and property.
   • Severe alert Imminent severe threats to safety of life and property.
   • AMBER alert Missing child alert.
4. Select to receive alerts in Spanish. Alerts in English can not be disabled.
5. Select to listen to WEA Ringtone.

Call settings

Call time
During a call, the duration of the call is shown. You can check the duration of all your calls.

Press ❯ Menu ➔ Settings ➔ Calls ➔ Call time:
• Last call to show the elapsed time of the most recent call.
• Outgoing calls to show the elapsed time of all dialed calls.
• Received calls to show the elapsed time of all received calls.
• Reset all ➔ Yes to reset all.

Answer mode
Press ❯ Menu ➔ Settings ➔ Calls ➔ Answer mode:
• Open to answer ➔ On to answer incoming calls by opening the phone.
• Any key ➔ On to be able to answer incoming calls by pressing any key (exemption ❌).
Call setup

Caller ID
Display or hide your phone number on the recipient's phone when you call.

Press 
Menu ➔ Settings ➔ Calls ➔ Call setup ➔ Caller ID:

• Set by network to use default setting by the network.
• Hide ID to never show your number.
• Send ID to always show your number.

Call waiting
You can handle more than one call at a time by putting the current call on hold and answering an incoming call. When activated, an alert tone is heard if there is an incoming call while talking.

• During a call, press Options ➔ Answer or press .

Activate call waiting
1. Press 
Menu ➔ Settings ➔ Calls ➔ Call setup.
2. Select Call waiting ➔ Activate.
3. Press Select to confirm.

Tip: Repeat and select Deactivate to disable call waiting.

Call divert
You can divert calls to an answering service or to another phone number. To enable this feature, do the following:

1. Press 
Menu ➔ Settings ➔ Calls ➔ Call setup ➔ Call divert:
   • Voice calls to divert all voice calls.
   • Unreachable to divert incoming calls if the phone is turned off or out of range.
   • No reply to divert incoming calls if unanswered.
   • If busy to divert incoming calls if the line is busy.
   • Cancel diverts to cancel all call divert settings.
2. Press Select to confirm.

Call barring
Your phone can be programmed to block certain types of calls.
Note! A password is needed to apply call barring. Contact Consumer Cellular to get the password.

Privacy & security

PIN code options
1. Press Menu ➔ Settings ➔ Privacy & security ➔ SIM lock ➔ SIM PIN:
   - On to activate the PIN code. You need to enter the PIN code every time the phone is started.
   - Off to deactivate the PIN code.

   **IMPORTANT!**
   If enabling Off-mode and the SIM card is lost or stolen, it is unprotected.

   - Automatic to start the phone without the PIN code. The phone remembers it automatically, but if the SIM card is moved to another phone (lost or stolen) the PIN code needs to be entered when the phone is started.

2. Press when done.

Note! To change PIN code, see *Passwords*, p.40

Phone lock
The phone lock protects your phone from unwanted usage. If activated, the phone is locked each time you close it and the phone code needs to be entered to unlock. You also need to enter the phone code after restart of the phone.

1. Press Menu ➔ Settings ➔ Privacy & security ➔ Phone lock.
2. Select On to enable, or Off to disable.
3. Press Next to confirm.

Note! You need to enter current phone code. Default phone code is 1234. To change the phone code, see *Passwords*, p.40

Whitelist
Select to only accept incoming calls from saved contacts.
Note! If enabled and no contacts in your phonebook, no calls can be received.
1. Press Menu ➔ Settings ➔ Privacy & security ➔ Whitelist.
2. Select On to enable, or Off to disable.
3. Press when done.

Blacklist
You can compile a blacklist of phone numbers so that any phone number on your blacklist is blocked when calling or texting you.

Activate the function and add blacklist numbers
1. Press Menu ➔ Settings ➔ Privacy & security ➔ Blacklist.
2. Select Activation.
   • On to activate the function.
   • Off to deactivate the function.
3. Select Number list.
4. Select Add ➔ Manual to add a number manually. Alternatively, press Phonebook to add a contact from the phonebook.
5. Select the contact and press View or Cancel.
6. Press Select to confirm.

Tip: To edit or delete an existing entry, select it and press Opt. ➔ Edit/Unblock.

When activated, you can add numbers directly from your call log, just press Options ➔ Block.

Passwords

Change code
1. Press Menu ➔ Settings ➔ Privacy & security ➔ Passwords ➔ PIN/PIN2/Phone code.
2. Enter current code.
3. Enter new code.

Reset settings
1. Press Menu ➔ Settings ➔ Privacy & security.
2. Select **Reset settings** to reset the phone settings. All the changes that you have made to the phone settings will be reset to default settings, but it keeps private data (e.g. photos and messages) and independent data. SIM card and memory card are not affected.

3. Enter the phone code and press **OK**.

   **Tip:** The default phone code is **1234**.

4. Press **Yes** to confirm and proceed with the reset.

### Reset all

1. Press **Menu ➔ Settings ➔ Privacy & security**.
2. Select **Reset all** to delete phone settings and content such as contacts, number lists and messages (SIM card and memory card are not affected).

3. Enter the phone code and press **OK**.

   **Tip:** The default phone code is **1234**.

4. Press **Yes** to confirm and proceed with the reset.

### Assistance

Please see *Assistance button*, p.17

### Storage

#### USB Storage

Enabling USB storage allows a computer or device connected using a USB-cable to access files on this phone.

1. **Press **Menu ➔ Settings ➔ Storage ➔ USB Storage**:  
   - **Enabled** to enable the function.
   - **Disabled** to disable the function.

2. Press **Select** to confirm.

#### Media storage

1. **Press **Menu ➔ Settings ➔ Storage ➔ Media storage**:
2. View how much space is used by each category of files and press **Go to app** to activate the linked app.
3. The following menu items are only visible if a memory card is installed:
• **Default media location** to set where all media will be saved by default. Existing data will remain in its current location.

  **Tip:** If default storage location is set to memory card, all photos and videos taken by the phone are stored in the **DCIM/Camera** folder on the memory card.

• **Format SD card** to erase all data stored on your SD card, such as music and photos. Press **Format** to confirm.

  **IMPORTANT!**
  Please note that this action is irreversible, so make sure that you have saved any wanted files on another media before proceeding.

• **Eject SD card** to safely remove the SD card. Press **Eject** to confirm.

  **Note!** You will not be able to access content on the SD card after you eject it.

4. Press 🔄 when done.

**Device**

**Device information**
See information regarding your phone.

1. Press ☰️ **Menu ➔ Settings ➔ Device ➔ Device information:**
   • **Phone number:** to see your own phone number.
   • **Model:** your own phone number.
   • **Software:** the main operating system.
   • **Software update:** to manually check if there’s a software update available and perform it. When a system software update is available, you will be notified. You need to have a working data connection to be able to perform the update with the firmware over-the-air (FOTA) service. See **Data connection**, p.33 on how to turn on your data connection. Remember to turn off your data connection after the update is finalized.

  **IMPORTANT!**
  Using mobile data services can be costly. We recommend that you check your data rates.
• **More information**: for more information about your device and it’s software.

• **Legal information**: to see the terms and conditions for licenses on your device.

**Battery**
See your phone’s battery status and activate power saving mode.

**Current level**
Displays how much charge remains in the battery.

**Power saving mode**
Once activated, the power saving mode, helps to increase battery life. To save power some features are turned off.

1. Press  ![Menu](image)  ![Settings](image)  ![Device](image)  ![Battery](image)  ![Power saving mode](image).
2. Select **On** to enable, or **Off** to disable.
3. Press ![when done](image).

**Turn on power saving mode automatically**
Set the power saving mode to automatically start functioning when the battery level reaches a certain level.

1. Press ![Menu](image)  ![Settings](image)  ![Device](image)  ![Battery](image)  ![Turn on automatically](image).
2. Set at what remaining battery power level to automatically activate power saving mode.
3. Press ![when done](image).

**Additional functions**

### Troubleshooting

#### Phone cannot be switched on

**Battery charge low**

Connect the power adapter and charge the battery for 3 hours.

**Battery incorrectly installed**

Check the installation of the battery.

#### Failure to charge the battery

**Battery or charger damaged**

Check the battery and charger.

**Charger incorrectly connected to phone or power socket**

Check the charger connections.

#### Standby time decreases

**Battery charge capacity too low**

Install a new battery.

**Too far from a cellular tower, phone is constantly searching for signal**

Searching the network consumes battery power. Find a place with a stronger signal, or temporarily turn off the phone.

Safety instructions

**CAUTION**
The device and the accessories can contain small parts. Keep all of the equipment out of the reach of small children. The AC power adapter is the disconnect device between the product and AC power. The AC power outlet must be close to the equipment and easily accessible.

### Network services and costs

Your device is approved for use on the 4G LTE FDD 2(1900), 4(1700), 5(850), 7 (2600), 12 (700) MHz, WCDMA 1 (2100) & 2 (1900), 4 (1700), 5 (850) MHz, GSM 850/1800/1900 MHz networks.

Using network services may result in traffic costs. Some product features require support from the network, and you may need to subscribe to them.

### Operating environment

Follow the rules and laws that apply wherever you are, and always turn off the device whenever its use is prohibited or can cause interference or hazards. Only use the device in its normal user position.

This device complies with guidelines for radiation when it is used either in a normal position against your ear, or when it is at least 0.6 in from your body. If the device is carried close to your body in a case, belt holder or other holder, these holders should not contain any metal, and should be placed at the distance from your body specified above. Make sure that the distance requirements above are followed.

Parts of the device are magnetic. The device can attract metal objects. Do not keep credit cards or other magnet-sensitive media or materials near the device. There is a risk that information stored on them can be erased.

### Medical units

The use of equipment that transmits radio signals, such as mobile phones, can interfere with insufficiently protected medical equipment. Consult a doctor or the manufacturer of the equipment to determine if it has adequate protection against external radio signals, or if you have any questions. If notices have been put up at health care facilities instructing you to turn off the device while you are there, you should comply. Hospitals and other health care facilities sometimes use equipment that can be sensitive to external radio signals.

### Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of 6 inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. Persons with pacemakers:

- Should always keep the phone more than 6 inches from their pacemaker when the phone is turned on.
• Should not carry the phone in a breast pocket.
• Should use the ear opposite the pacemaker to minimize the potential for interference.

If you have any reason to suspect that interference is taking place, turn the phone off immediately.

**Areas with explosion risk**

Always turn off the device when you are in an area where there is a risk of explosion. Typically these are areas where you are requested to turn off your car engine. Follow all signs and instructions. In these areas, sparks can cause an explosion or fire which can lead to personal injury or even death.

Turn off the device at filling stations, and any other place that has fuel pumps and auto repair facilities.

Follow the restrictions that apply to the use of radio equipment near places where fuel is stored and sold, chemical factories and places where blasting is in progress.

Areas with risk for explosion are often – but not always – clearly marked. This also applies to areas such as below decks on ships; the transport or storage of chemicals; vehicles that use liquid fuel (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powder.

**Protect your hearing**

⚠️ **WARNING**

Excessive exposure to loud sounds can cause hearing damage. Exposure to loud sounds while driving may distract your attention and cause an accident. Listen to a headset at a moderate level, and do not hold the device near your ear when the speakerphone is in use.

**Emergency calls**

**IMPORTANT!**

Mobile phones use radio signals, the mobile phone network, the terrestrial network and user-programmed functions. This means that connection cannot be guaranteed in all circumstances. Therefore, never rely only on a mobile phone for very important calls such as medical emergencies.

**Vehicles**

Radio signals can affect electronic systems in motor vehicles (for example, electronic fuel injection, ABS brakes, automatic cruise control, air bag systems) that have been incorrectly installed or are inadequately protected. Contact the manufacturer or its representative for more information about your vehicle or any additional equipment.

Do not keep or transport flammable liquids, gases or explosives together with the device or its accessories. Most vehicles come equipped with air bags; keep in mind that air bags
fill immediately with considerable force. Do not place objects, including fixed or portable radio equipment in the area above the airbag or the area where it might expand. Serious injuries may occur if the airbag deploys near mobile phone equipment that is incorrectly installed.

It is prohibited to use the device in flight. Turn off the device before you board a plane. Using cellular devices inside a plane can pose risks to air safety and interfere with telecommunications. It may also be illegal.

**Driving safely**

Adapted from CTIA-The Wireless Association®

---

**WARNING**

Use of this device alone or with headphones (even if used only in one ear) while driving a motor vehicle or riding a bicycle is dangerous and is illegal in some areas. Driving while operating a mobile phone is distracting and could cause serious injury or death.

---

If you decide to use this device while driving or riding a bicycle, keep in mind the following guidelines:

- **Give full attention to driving and to the road.**
  
  Using a mobile device while driving may be distracting. If you find it disruptive or distracting while operating any type of vehicle, riding a bicycle, or performing any activity that requires your full attention, pull off the road and park before making or answering a call if driving conditions require.

- **Get to know your phone and its features such as the phone book, call memory, and speakerphone.**
  
  These features help you to place your call without taking your attention off the road. See the applicable portion of this user’s guide for more information.

- **Use a hands-free device.**
  
  Add an extra layer of convenience and safety to your device with one of the many hands-free accessories available. Use of a headset or other hands-free device may be legally required. Several states have in recent years passed laws making it unlawful to operate a motor vehicle while talking on a wireless phone without use of a headset, speakerphone, or other hands-free device. County and municipal ordinances may also limit or ban wireless conversations for automobile drivers. You should therefore check the status of such laws in your area and in locations to which you travel by car, whether or not you otherwise follow the preferred safety practice of routinely using a hands-free device. For SMS text messaging, it is a recommended safety practice that you never send or view received text messages while driving; in California, and likely other states in the future, SMS messaging by a driver is also a legal violation.

- **Position phone within easy reach.**
  
  Keep your eyes on the road. If you get an incoming call at an inconvenient time, let your voicemail answer it for you.

- **Assess the traffic before dialing, or place calls when you are not moving or before pulling into traffic.**
Try to plan calls when your car will be stationary. Never dial, send SMS text messages, or enter other text while you are driving. Driving while operating a mobile phone is distracting and could cause serious injury or death.

• **Let the person you are speaking with know you are driving.**
  If necessary, suspend the call in heavy traffic or hazardous weather conditions such as rain, sleet, snow, icy roads, and fog.

• **Do not take notes, look up phone numbers, or perform any other activities that require your attention while driving.**
  Jotting down a to-do list or flipping through your address book takes attention away from your primary responsibility: driving safely.

• **Do not engage in stressful or emotional conversations that may be distracting.**
  Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.

### Hearing aid compatibility

**Note!** For hearing aid compatibility, turn off Bluetooth connectivity.

Your mobile device model complies with FCC rules (C63.19-2007) governing hearing aid compatibility. These rules require an M3 microphone or higher value. The M-value, shown on the device box and below, refers to lower radio frequency (RF) emissions. A higher M-value generally indicates that a device model has a lower RF emissions level, which may improve the likelihood that the device will operate with certain hearing aids. Some hearing aids are more resistant than others to interference. Please consult your hearing health professional to determine the M-rating of your hearing aid and whether your hearing aid will work with this device.

This device is set for direct connection to telecoil equipped hearing aids. When both the telecoil hearing aid (T switch) and the phone telecoil are activated, using the device with the aided ear will provide a direct connection for audio through your hearing aid. The quality of sound depends on the type of hearing aid used. You should test the device with the telecoil setting activated to determine whether your audio performance improves.

Your device meets the M4/T4 level rating.

### TTY compatibility

Your phone is TTY-compatible, allowing you to connect a TTY device to the phone’s headset jack. Please check with the manufacturer of your TTY device to ensure that it is compatible with digital cell phones. Before you can use your phone with a TTY device, you’ll need to enable TTY Mode.

### RF exposure information (SAR)

This model phone meets the government’s requirements for exposure to radio waves. This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a device of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.
Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 1.22 W/kg and when worn on the body, as described in this user guide, is 1.26 W/kg (Body-worn measurements differ among phone models, depending upon available enhancements and FCC requirements).

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/ea/fccid after searching on FCC ID: WS5DFC0180

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 0.6 in from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 0.6 in from your body when the phone is switched on.

*In the United States, the SAR limit for mobile phones used by the public is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements. SAR values may vary depending on national reporting requirements and the network band.

### Disclaimer and Limitation of Liability

Doro AB and its affiliates, licensees and retailers assume no responsibility for any damage or loss resulting from the use of this guide. Doro AB and its affiliates, licensees and retailers assume no responsibility for any loss or claims by third parties that may arise through the use of this software. Doro AB and its affiliates, licensees and retailers assume no responsibility for any damage or loss caused by deletion of data as a result of malfunction, dead battery, or repairs. Be sure to make backup copies of all important data on other media to protect against data loss.

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, UNDER NO CIRCUMSTANCES SHALL DORO AB OR ANY OF ITS AFFILIATES, LICENSEES AND RETAILERS BE RESPONSIBLE FOR ANY LOSS OF DATA OR INCOME OR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGES HOWSOEVER CAUSED. THE CONTENTS OF THIS DOCUMENT ARE PROVIDED “AS IS.” EXCEPT AS REQUIRED BY APPLICABLE LAW, NO WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE MADE IN RELATION TO THE ACCURACY, RELIABILITY, OR CONTENTS OF THIS DOCUMENT. DORO AB RESERVES THE RIGHT TO REVISE THIS DOCUMENT OR WITHDRAW IT AT ANY TIME WITHOUT PRIOR NOTICE.
FCC notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and the receiver.
• Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

The FCC can require you to stop using your device if such interference cannot be eliminated.

Doro has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user’s authority to operate the equipment.

Care and maintenance

Your device is a technically advanced product and should be treated with the greatest care. Negligence may void the warranty.

• Protect the device from moisture. Rain, snow, humidity, and all types of liquids can contain substances that corrode the electronic circuits. If the device gets wet, you should immediately power off the phone, remove the battery and allow the device to dry completely before you replace it.
• Do not use or keep the device in dusty, dirty environments. The device’s moving parts and electronic components can be damaged.
• Do not keep the device in warm places. High temperatures can reduce the lifespan for electronic equipment, damage batteries and distort or melt certain plastics.
• Do not keep the device in cold places. When the device warms up to normal temperature, condensation can form on the inside and can damage the electronic circuits.
• Do not try to open the device in any other way than that which is indicated here.
• Do not drop or shake the device. If it is treated roughly the circuits and precision mechanisms can be broken.
• Do not use strong chemicals to clean the device.
• Maintain the battery and phone during operation between 32 °F–113 °F. If the phone and battery become too warm or too cold, the phone and battery may not
work temporarily, even if the battery is fully charged. Subjecting the phone and battery to excessive temperatures can create a safety hazard resulting in fire, explosion or other hazards.

- Do not disassemble, open, crush, bend, deform, puncture or shred.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per IEEE-Std-1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
- Promptly dispose of used batteries in accordance with local regulations.
- Battery usage by children should be supervised.
- Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
- Improper battery use may result in a fire, explosion or other hazard.

For devices that utilize a USB port as a charging source, the device's user manual shall include a statement that the device shall only be connected to CTIA certified adapters, products that bear the USB-IF logo or products that have completed the USB-IF compliance program.

The advice above applies to the device, battery, AC power adapter and other accessories. If the device is not working as it should, please contact the place of purchase for service. Don’t forget the receipt or a copy of the invoice.

### Battery disposal and recycling information

When the battery in this device has reached the end of its useful life, please dispose of it according to your local environmental laws and regulations. For information about recycling cell phone batteries, go to: [http://www.rbrc.org](http://www.rbrc.org).

The symbol means that according to local laws and regulations your product should be disposed of separately from household waste. When the battery in this device has reached the end of its useful life, take it to a collection point designated by local authorities. Some collection points accept products for free. Proper disposal of the battery and recycling of the device will help reduce waste, conserve natural resources and protect the environment.
Warranty

This product is guaranteed for a period of 12 months from the date of purchase. In the unlikely event of a fault occurring during this period, please contact Consumer Cellular. Proof of purchase is required for any service or support needed during the guarantee period. This guarantee will not apply to a fault caused by an accident or a similar incident or damage, liquid ingress, negligence, abnormal usage, non-maintenance or any other circumstances on the user’s part. Furthermore, this guarantee will not apply to any fault caused by a thunderstorm or any other voltage fluctuations. As a matter of precaution, we recommend disconnecting the charger during a thunderstorm.

Batteries are consumables and are not included in any guarantee.

This guarantee does not apply if batteries other than DORO original batteries are used.
