Getting Started

Charging

Warning

Only use batteries, chargers and accessories that have been approved for use with this particular model. Using other accessories may be dangerous and may invalidate the phone’s type approval and guarantees.

When the battery is running low, the icon is displayed and a warning signal is heard. To charge the battery, connect the AC power adapter into the wall socket and to the charging socket on the phone.

Important!

Turn off the phone and disconnect the charger before removing the battery cover.

Installing the SIM card and battery

The SIM card and battery are normally pre-installed for you. Follow these instructions so you never need to access them yourself.

1. Remove the battery cover if it is already installed.

2. Optional: Insert the memory card into the slot under the SIM card holder. Make sure that the memory card contacts are facing upwards and push it in until you hear a click. Take care not to scratch or bend the contacts on the card and press OK.

3. To remove or replace the card, push it in until you hear a click and then pull it out.

4. Insert the SIM card gently into the holder. Make sure that the SIM card’s contacts are facing down correctly and that the cut off corner is pointing inwards. Take care not to scratch or bend the contacts on the card.

5. Insert the battery by sliding it into the battery compartment. Replace the battery cover.

Making a call

1. Press and hold 1 to start the call.

2. Press 2 to end the call.

3. Press 3 to reject the call directly.

4. Press 4 to end the call.

5. To answer an incoming call when the flip is closed, press the flip. If the flip is already open, or if Open to answer is set to Off, press 1 to answer, or press 2 to reject the call (busy signal).

6. When a call is in progress, the volume control adjusts the ringer volume.

7. Press 5 to adjust and press OK to set the answer as one of the first 10 contacts listed in the phonebook.

8. Press 6 to enter the phone number(s) including the area code.

9. Press 7 to add subject.

10. Press 8 to add video.

11. Press 9 to add items to the message.

12. Press * to add more recipients or select Close to end the call.

13. Press # to answer, or press Silent to switch off the call signal and then reject to reject the call (busy signal).

14. Press and hold # to end the call.

15. To return to standby, press Menu/Settings/Call/logs/Answer mode in the complete manual.

Volume control

Use the volume keys to adjust the volume level on the display. When a call is in progress, the volume control adjusts the ringer volume.

Entering text

Use eZiType™ input method which uses a dictionary of pre-programmed word phrases and automatically suggests the most likely word. To adjust the sound volume, use the volume keys to adjust and press OK to set the volume level on the display.

Creating and sending text messages

1. Press Menu/Contacts/Speed dial/Manage phonebook or press Menu to scroll to and press OK.

2. Select and press OK and then use to scroll to the list of entries.

3. Press to call or press OK to return to standby and press Menu/Settings/Answer mode in the complete manual.

Messages

Sending a text message

1. Press Menu/Contacts/Speed dial/Manage phonebook or press Menu to scroll to and press OK.

2. Select and press OK and then use to scroll to the list of entries.

3. Press to call or press OK to return to standby and press Menu/Settings/Answer mode in the complete manual.

4. To send a text message, select the recipient(s) by pressing the keypad and press OK.

5. Press and hold # to end the call.

6. To adjust and press OK to set the entry as one of the first 10 contacts listed in the phonebook.

7. To enter the phone number(s) including the area code, press 1 to enter the phone number(s) including the area code.

8. Press 2 to add subject.

9. Press 3 to add video.

10. Press 4 to add items to the message.

11. Press * to add more recipients or select Close to end the call.

12. Press # to answer, or press Silent to switch off the call signal and then reject to reject the call (busy signal).

13. Press and hold # to end the call.

14. To return to standby, press Menu/Settings/Call/logs/Answer mode in the complete manual.

Other Call Settings

Voice mail

The voice mailbox can be called by pressing and holding 1.

Speed dial

Use the speed dial keys and 1 to 9 and the numerical keys and 0 for speed dialing.

Adding speed dial numbers

1. Press Menu/Settings/Calls/Speed dial.

2. Press and holding 0 for the contact, see Getting Started.

3. Press to associate a picture to the contact, see Getting Started.

4. Press to move the cursor within the text.

5. Press to enter the phone number(s) including the area code.

6. Press and holding 0 for the contact, see Getting Started.

7. Press 0 to return to standby.

8. Press 0 and holding 0 for the contact, see Getting Started.

9. Use the volume keys to adjust and press OK to set the answer as one of the first 10 contacts listed in the phonebook.

11. Press and holding 0 for the contact, see Getting Started.

12. Press 0 to return to standby.

13. Press 0 and holding 0 for the contact, see Getting Started.

14. Use the volume keys to adjust and press OK to set the answer as one of the first 10 contacts listed in the phonebook.

15. Press 0 to return to standby.
Incorporates a substantial margin of safety to give additional protection against harmful interference in a residential environment. This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and the receiver.
3. Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

The FCC or Industry Canada can require you to stop using this device if it is found to be causing interference.

Care and Maintenance

Your unit is a technically advanced product and should be treated with the greatest care. Negligence may void the warranty.

• Protect the unit from moisture. Rain, snow, and moisture can adversely affect electronic equipment. Do not expose the unit to excessive moisture, rain, or water.

• Do not expose the unit to dusty, dirty environments. The unit’s moving parts and electronic components can become damaged.

• Do not keep the unit in warm places. High temperatures can reduce the lifespan of electronic components, damage batteries, and distort or crack plastic cases.

• Do not apply water or liquids to any part of the unit. Any liquid that enters the unit can damage the circuitry and void the warranty.

• Do not use the unit in cold places. When the unit warms, it can cause the unit to operate at incorrect settings.

• Do not open the battery compartment. The internal components can be damaged.

• Do not drop the unit. Do not knock or shake it either. If the unit is damaged, do not attempt to open it. Items such as small screws or internal components can be broken.

To determine the rating of your hearing aid or whether your device is suitable for use with the device, your device must meet the M3/4 level rating. The M3 and M4 levels are used to determine the level of hearing loss that a hearing aid or cochlear implant should be able to cover to allow the user to perform a certain task. The M3 level is used for individuals with mild to moderate hearing loss, while the M4 level is used for individuals with moderate to severe hearing loss.

The advice above applies to the unit, battery, AC power charger, and/or external charger. If your unit does not work as expected, please contact Consumer Cellular for assistance. For more information about the M3/4 level rating, please visit the American Speech-Language-Hearing Association (ASHA) website: http://www.asha.org.

Battery disposal and recycling information

Under U.S. law, state and local laws, and regulations your product should be disposed of properly, and not discarded, as electronic waste. Please dispose of this product according to your local environmental laws and guidelines. For more information about the recycling program, please visit the Commission on Environmental Cooperation website: www.meritrec.com. For further information contact: Consumer Cellular.

Dental equipment

Some hearing aids are more immune than others are to emissions. A higher M-value generally indicates that a device will perform better in the presence of emissions. The Hearing Aid Compatibility (HAC) regulations apply to all wireless devices. They are designed to protect the hearing of people with hearing aids.

Emergency calls

If you have any reason to suspect that interference is taking place, turn off the unit.

Areas with explosion risk

Listen to a headset at a moderate level, and do not hold the device too close to the ear during the transfer as this can cause interference.

Vehicle safety

If you use this unit while driving or while riding a bicycle, keep in mind the following guidelines:

• Give full attention to driving and to the road. Use a mobile device while driving may be distracting. If you find it distracting or disruptive while operating any type of vehicle, riding a bicycle, or performing any act that requires your full attention, pull off the road and park before making or answering a call.

• Get to know your phone and its features such as phone book, call memory, and speed dial.

These features help you plan your call without taking your eyes off the road or your attention away from driving.

• Use a hands-free device.

An extra layer of convenience and safety to you with your phone while you are driving. Use of a headset or other hands-free device may be legally required by law in your state or country. In some countries, use of a hands-free device is required when talking on a wireless phone without use of a headset. You are recommended to follow the local laws and regulations. Most municipal ordinances may also limit or ban wireless communications for drivers. Check the laws of such a country or state that you are in to ensure you do not commit a traffic violation.

• Position phone within easy reach.

Keep your phone out of your lap while driving in an incoming call at the inconvenient time, let your voice mail answer for you.

Battery: 3.7V/800 mAh Li-ion battery

Warning

This product is approved for a period of 2 months from the date of purchase. In the unlikely event of a malfunction or defect, please return your product to Consumer Cellular. Proof of purchase is required for any service or repair. If your unit is not working properly, please return it to Consumer Cellular. This guarantee will not apply to a malfunction caused by an accident, abuse, or neglect, or any unauthorized repair. If your unit is not working properly, please return it to Consumer Cellular. This guarantee will not apply to a malfunction caused by an accident, abuse, or neglect, or any unauthorized repair. In the event of any malfunction, please contact Consumer Cellular for assistance.

Note!

Dorothy's warranty does not affect your legal (statutory) rights under your applicable national laws relating to the sale of consumer products.
