Charging

Warning: Only use batteries, charger and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone’s warranty.

To charge the battery, connect the AC power adapter to a wall socket and to the charging socket on the right side of the phone. It takes approximately 3 hours to fully charge the battery.

Note: Before removing the battery cover, turn off the phone and disconnect the charger.

Installing the SIM card and battery

The SIM card and battery are normally pre-installed for you. Follow these instructions should you ever need to access them yourself. The SIM card holder is located behind the battery:

1. Remove the battery cover by pressing it carefully down and sliding away from the emergency call key.
2. Remove the battery if it is already installed.
3. Press lightly on the cardholder and carefully slide it towards the emergency call key.
4. The SIM card holder can now be folded into an upright position.
5. Placing the SIM card on the marked area of the compartment. Make sure that the silver contacts are facing downwards and that the cut-off corner is placed accordingly with the marked area. See picture. Take care not to scratch or bend the contacts on the SIM card.
6. Fold the SIM card holder down and carefully slide it away from the emergency call key until it “clicks” into place.
7. Insert the battery by sliding it into the battery compartment with the contacts facing towards the emergency call key.
8. Replace the battery cover until it “clicks” into place.

Getting Started

Turning phone on/off

Press and hold the red button on the phone to turn it on/off. It takes several seconds so keep holding until you hear the sound.

Setting the language, time and date

These are all set for you. The menu language will default to English. See the full manual for you would like to change this setting.

The date and time are automatically set to the local time for the area you are in when the phone is turned on.

Making a call

1. Enter the phone number.
2. Press # to start the call.
3. Press * to end the call.

Note: There is no dial tone. Simply have the phone turned on and it is ready for use.

Receiving a call

1. Press to answer.
2. Press to end the call.

Discretion and Limitation Of Liability

Do not dislike and aliens and other agreements assume no responsibility for any damage or loss resulting from the use of this guide. Do not dislike and aliens or licenses assume no responsibility for any loss or claims by third parties that may arise through the use of this software. Do not dislike and aliens assume no responsibility for any damage or loss caused by deletion of data as a result of malfunction, data backup, or repairs. Be sure to make backup copies of all important data or other media to protect against data loss.

At the maximum extent permissible by applicable law, in no event will Doro AB, its affiliates, or any other licensor be liable for any loss or any other licence in connection with the use of this guide.

Areas with explosion risk

Care and Maintenance

While there may be differences between the SAR levels of various phones and at various positions, they all meet the requirements governed by the applicable regulations.

The FCC has granted an Equipment Authorization for this mobile phone with all reported SAR levels evaluated at as many frequencies and positions as possible. Technical information on this model phone is file with the FCC and can be made available upon request to: The FCC, Room 1-A99, Washington, D.C. 20554 or call 1-888-CALL-FCC (1-888-225-5322).

RF exposure information (SAR)

For body worn operation, this phone has been tested and meets the requirements for use with an accessory designated as hands free kit listed in the SAR kitudiag section of the display Grant section of this manual. For complete information on SAR and other regulations, please visit the Web site of the applicable body worn accessory manufacturer.

Battery disposal and recycling information

When the battery in this unit has reached the end of its useful life, dispose of it according to your local environmental laws and regulations. For information about recycling cell phones in your area, please visit: http://www.reuse.net/.

Warning!

The unit and the accessories contain small parts. Keep all of the equipment out of the reach of small children.

Operating environment

Follow the rules and laws that apply whenever you are, and always turn off the unit when it is prohibited or can cause interference or hazards. Only use the unit in its normal condition. This unit complies with guidelines for radiation when it is used either in a normal position or against your ear, or when it is placed close to your body (less than 5 cm). If the unit is carried close to your body in a case, belt holster or similar, the unit’s power output will be increased and the product should be placed at a distance from your body. If while in normal use (i.e. instructions are followed) the transfer is complete. Do not use metal objects. Do not keep credit cards or other magnetic media near the unit. Information stored on them can be erased.

Medical units

The use of equipment that transmits radio signals, for example, mobile phones, can interfer with the operation of medical equipment and result in harm to the patient. Such equipment may include pacemakers, hearing aids, and other medical equipment. The equipment user must ensure that the operation of the mobile phone does not interfere with the proper functioning of the medical equipment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to other equipment. If you are not sure whether this equipment might cause harmful interference to another equipment, turn it off and operate it in accordance with the instructions provided by the manufacturer.

Pacemakers

Although the Mobile Industry Navigation Association recommends that a minimum separation of 6 inches (15 cm) be maintained between the user’s body and a device that contains a medical implant, the FDA/CDRH acknowledges that there is no guarantee that interference will not occur in any particular installation. If this equipment does cause harmful interference to the operation of a pacemaker or other medical equipment, please consult your medical practitioner or the manufacturer of the device for recommendations.

Transmitters within the unit or accessories may cause interference or hazards. Only use the unit in its normal condition.

Warning!

Always keep the PhoneEasy 410 from more than 6 inches (15 cm) from any pacemaker when the phone is turned on or in use. If you have a heart pacemaker, consult your physician before using this product. Do not carry the PhoneEasy 410 in a breast pocket. Use the earphone and acoustic coupler to minimize the potential for interference.

If you have any reason to suspect that interference is taking place, turn the phone off immediately.

If you do not use a body-worn accessory and are not using a body-worn accessory, these holders should not contain any metal, except iron or steel. Avoid holding the phone in your hand, except when it is turned off. Do not use the phone in wetland environments. Infrared signals, natural radioactive and other electromagnetic emissions can damage the unit’s electronic components.

Battery usage by children should be supervised.

The symbol to the left means that according to local laws and regulations your product should be disposed of separately from household waste. The separate collection and recycling of your electronic waste at the time of disposal will minimize potential negative effects on the environment and human health which could be caused by improper waste management. For more detailed information about recycling your electronic waste, please contact your local city office.

Contrary to what is required by applicable law, the use of any personal or public network operated by Doro AB and its affiliates, and licensors or any other person, may be legally required.

This guarantee will not apply to a malfunction caused by an accident or a similar incident or damage, liquid penetration, mechanical stress, unauthorized repair, or any other condition not specified in the applicable portion of this user’s guide. The user violates any of the terms and conditions of this guarantee.

Varian position within easy reach.

Keep your eyes on the road. If you get an incoming call while you are driving, please avoid talking in a hands-free manner.

Assess the traffic before dialing, or place calls when you are not moving or before pulling into traffic.

Treat all phone calls as if you were in a vehicle. Do not attempt to operate a vehicle or place calls while talking on a smartphone using any function or feature of the device.

Do not take notes, look up phone numbers, or perform any other activity that requires your attention while driving.

Driving safely

Get to know your phone and its features. This means that connection cannot be guaranteed in all circumstances. Therefore, you should never rely solely on a mobile phone for any important calls such as medical emergencies.

Emergency calls

Mobile phones such as the unit you use include radio signals, the mobile phone network, the network and user-programmed functions. This means that connection cannot be guaranteed in all circumstances. Therefore, you should never rely solely on a mobile phone for any important calls such as medical emergencies.

Driving safely

Use of this unit alone or with headphones (even if used only in one ear) while driving a motor vehicle or riding a bicycle is dangerous and is illegal in some areas, and the user should not engage in such conduct. These devices can make you and other drivers too distracted and could cause serious injury or death.

If you use this unit alone or with headphones, keep in mind the following guidelines:

• Give full attention to driving and to the road. The use of this equipment may cause you to lose your sense of direction, distance and speed. If you find it disruptive or distracting while operating any kind of equipment, cease using it.

• Do not engage in any activity that requires your full attention, pull off the road and park your vehicle in a safe location before engaging in such activity.

• Get to know your phone and its features such as voice band, speakerphone, and other hands-free devices.

• Do not drive after consuming alcohol and other substances that may impair your judgment, reaction time, or coordination.

• County and municipal ordinances may also limit or ban wireless communications for motor vehicle drivers. Always check the laws and regulations your product should be disposed of separately from household waste. The separate collection and recycling of your electronic waste at the time of disposal will minimize potential negative effects on the environment and human health which could be caused by improper waste management.

For more information about recycling your electronic waste, please contact your local city office.
